AERCHAIN

May 2026 | ● STRICTLY CONFIDENTIAL

TECHNICAL & COMMERCIAL PROPOSAL · MAY 2026 · AERCHAIN × ADANI GROUP

The **Agentic Procurement** Layer for Adani Group

An AI-native sourcing, vendor-onboarding and spend-intelligence layer that sits on top of your Ariba, MDG and SAP estate today — and transitions toward SAP-direct as the group's SAP estate grows from 14 toward 18 instances.

PREPARED FOR	ENGAGEMENT	ESTATE	HOSTING
Suresh Shinde, Group CPO Devesh Khandelwal, GM	Upstream agentic S2C + Vendor Onboarding	14 → 18 SAP S/4HANA MDG · Ariba · group-wide	AWS Mumbai default BYOC supported

Prepared by **Gaurav K. Guha**, Head of Sales, Aerchain · gaurav.guha@aerchain.io · +91 96195 04839

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — the only Indian platform that carries both a full source-to-pay suite and a best-in-class autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Ariba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty
Co-Founder & CEO
BITS Pilani | EX BOSCH
BITS Pilani. Built SupplyBasics (B2B commerce) before founding Aerchain in 2019. 10+ years in procurement & supply chain.

Himavanth Jasti
Co-Founder & CTO
BITS Pilani | EX BANK OF AMERICA · practo
Founding engineering. Platforms built at scale across fintech, health-tech and HR-tech. ~80% founding-team retention to date.

CAPITAL & BACKING · $16M RAISED
Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** seed + Series A re-investor; Season Two Ventures (seed).

ACCELERATORS: Jio GenNext · Innovation Brewery (#webrewinnovation) · Supply Chain Labs by Lumis

INVESTORS · $16M TOTAL RAISED: Pavestone (SERIES A LEAD) · Infosys (SERIES A) · indiamart (SEED) · S2 Season Two Ventures (SEED)

CERTIFICATIONS: ISO 27001 Certified · EU GDPR Compliant · SOC 2 Type II Certified

INTEGRATIONS: SAP · Microsoft Dynamics 365 · SAP Ariba · coupa · ORACLE · servicenow · ZYCUS · ivalua

RECOGNITIONS: Gartner · SaaS BOOMi · Inc42 · ProcureTech

Profitable & cash-flow positive · 125+ team · Bengaluru HQ · Founded 2019

Across customer base	Active on platform	Within 90 days	Cycle-time reduction	30+ countries	ISO 27001 · GDPR

PROOF AT CONGLOMERATE SCALE

Live where it matters most

The Reliance Group runs Aerchain source-to-contract group-wide — SAP + Ariba integrated, live across hydrocarbons, O2C and manufacturing, rolling out company by company. The directly relevant precedent for Adani's multi-entity, SAP-heavy estate.

Reliance Group · S2C group-wide · Unilever · autonomous sourcing on Coupa · AB InBev · Danone · Meta · auctions · JDE Peet's · Emirates Global Aluminium · NSE · BYOC · CenturyPly

WHERE AERCHAIN IS DIFFERENT

- **AI-native, not bolted on** — Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.
- **Full suite + autonomous sourcing** — Everything Ariba, Coupa, Zycus, Jaggaer and GEP do — plus the autonomous-sourcing depth of Fairmarkit, Keelvar and Pactum. They each hold a fraction; we hold the whole.
- **SAP-native by design** — Bi-directional S/4HANA, ECC and Ariba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

2 Understanding Adani's Requirement

Adani is one of India's most mature SAP customers. The estate is largely built; the next move is intelligence, not integration. This proposal maps directly to the two priorities surfaced on 27 May: a faster, governed vendor-onboarding and due-diligence process, and an autonomous sourcing layer for the tactical and tail spend — both sitting on top of Ariba, MDG and SAP.

Ariba Spend	Purchase Orders	Operating Businesses	SAP Instances
$20B+	**~100K**	**24+**	**14→18**
Through Ariba annually	Per year	Group-wide	Growing via M&A

THE ESTATE, AS IT STANDS

SAP-heavy, well-consolidated, MDG-governed

- **ERP:** SAP S/4HANA — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- **Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under SOX; objects are created once and synced, never duplicated.
- **Procurement:** SAP Ariba group-wide since 2021 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted; SLP, Contracts and Spend Analysis adoption is mixed.
- **Network:** SAP Business Network for vendor transactions.

THE SPEND, WHERE WE WIN

Strategic stays; we take the tactical & tail

Of the $20B+ routed through Ariba, the strategic core is well served. The opportunity is the slice where Ariba's transactional spine hits its limits — high-volume, lower-value spend with no human bandwidth for competitive bidding, and the ~70% of vendors who sit in the tail.

Strategic · bulk commodities, EPC, capex, fuels	Ariba retains
Tactical · MRO, services, logistics, mid-value capex	Aerchain
Tail · indirect, plant-local, MSME, ad-hoc	Aerchain

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

- **Slow & fragmented today** — A deliberately stricter onboarding process — built to de-risk bad vendors — has become very lengthy. No single owner; the vendor is spread across SAP, Ariba and MDG. Blocking and blacklisting still run over email.
- **Costly third-party diligence** — The current TBDT process — adverse media, financial, legal and business risk — is commercially expensive and externally dependent, with no configurable per-BU risk appetite.
- **Unstructured master data** — No structured OEM-vs-dealer tagging in MDG (SKF, Schaeffler, NSK and their channel partners), and multiple codes per item — so AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES

Layer on Ariba/MDG/SAP now; transition toward SAP-direct as the estate standardises

Phase 1, Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Ariba, writing back to SAP and MDG. As the estate grows from 14 toward 18 instances and processes standardise over time, the same orchestration layer migrates progressively to SAP-direct where Ariba is retired — without forcing a rip-and-replace at any point. This mirrors the Reliance and Unilever "sit on top, then expand" pattern already in production.

Honest scope boundaries. Aerchain is a technology platform, not a catalog aggregator — third-party marketplace (L2 punch-out) integration into your Ariba is already handled natively by Ariba and is not part of this proposal. Contract redlining / track-changes authoring is on our roadmap, not in current scope; we generate contracts from awards and hold the rate-contract repository today. Atlas (the conversational agent) reaches general availability shortly and is positioned as an enablement layer, not a Phase-1 dependency.

3 Solution Scope

An upstream agentic procurement suite, governed and SAP-native: request capture for every business user, autonomous and strategic sourcing through to award and PO sync, AI vendor onboarding with automated due diligence, vendor performance management, and live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS

1. **Platform Subscription (SaaS)** — Modules 1–3: Vendor Onboarding & Management, Intake & Orchestration, and Sourcing & Negotiation. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.
2. **Implementation & Integration Services** — deploy all three modules: configuration, SAP S/4HANA / Ariba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Module 1 — Vendor Onboarding & Management · Module 2 — Intake & Orchestration · Module 3 — Sourcing & Negotiation · Enterprise Integration (SAP / Ariba / MDG) · Module 4 — P2P Automation · Future

Phase 1 landing scope: Vendor onboarding with AI-assisted due diligence as the wedge + autonomous sourcing for tactical and tail spend + strategic sourcing orchestration over the existing Ariba / SAP / MDG estate. Integration is a dedicated program line — not bundled into platform fees.

UPSTREAM AGENTIC SUITE — IN SCOPE

- **Intake & Orchestration** — Enterprise-wide request capture for **15,000 business users** via a single co-pilot — sourcing, contract, onboarding or invoice requests, with AI auto-classification and policy-based routing. Zero procurement training for requesters.
- **Autonomous & Strategic Sourcing** — From a vague intake to a complete RFQ — SOW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable autonomy per category: suggest, co-pilot, or full-auto. Human-in-the-loop for the first months, then touchless.
- **Negotiation, Award & PO Sync** — Multi-round autonomous negotiation (discovery → benchmark pressure → target push) with a transparent should-cost model. Natural-language award scenarios. Award/PO written back to Ariba and SAP S/4HANA via API.
- **Vendor Onboarding + Due Diligence** — AI-assisted registration (buyer-initiated or self-service), GST/PAN/MCA validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain's own AI signal aggregation against a configurable, per-BU risk appetite.
- **Vendor Performance Management** — Vendor 360 enriched from GRN data — delivery performance, spend trend, price indices, every PO — plus web/news/compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, tier-change), with scheduled recertification.
- **Spend Insights** — Category dashboards with live market indices — steel with contract-lock signals, ocean freight benchmarked with a disruption monitor, lubricants priced off crude / base-oil / SN-150 / SN-500 formulas — plus geopolitical supply-risk analysis.

MODULE-BY-MODULE SCOPE & CAPABILITIES

Each module is independently licensable. Phase 1 covers Modules 1–3; Module 4 (P2P) is a committed future lane — separate terms at activation.

1 Vendor Onboarding & Management — Vendor Risk & TPDD · Vendor 360 · Performance — ✓ Phase 1
AI onboarding portal · AI doc extraction · GST / MSME matching · Sanctions & adverse media · Financial & legal risk · Per-BU risk config · Vendor 360 & AVL · CAPA & VPE scorecards

2 Intake & Orchestration — Request capture · AI routing · PR-to-PO — ✓ Phase 1
Co-pilot for 15,000 users · AI auto-classification · PR-to-PO tracker · Policy-based routing · Multi-BU RBAC · Immutable audit ledger · Spend insights (live indices) · Atlas conversational agent

3 Sourcing & Negotiation — Strategic + Autonomous · e-Auction · NFA — ✓ Phase 1
RFx & two-envelope · AI TBER & CS · e-Auction amenability · Autonomous tactical / tail · Multi-round negotiation agent · Should-cost (live indices) · NFA & DoA routing · Award write-back to Ariba / SAP

4 P2P Automation — PR-to-PO · Invoice OCR · AP — Future · Separate Terms
PO lifecycle & GRN · 3-way match · Invoice OCR · 2 / 3-way match · Exception handling · Payment release

INTEGRATION ARCHITECTURE — CONFIGURED AT THE OBJECT AND INTERFACE LEVEL, NOT CUSTOM-CODED

Today — SAP / Ariba / MDG
- SAP S/4HANA — PR & vendor master
- Ariba — onboarding front end + guided buying
- MDG — master data (no OEM/dealer tag)

→ REST / RFC / BAPI — PHASE 1 LAYER ON TOP →

Phase 1 — Aerchain — AI front end + write-back
- AI onboarding & due diligence
- Autonomous & strategic sourcing
- REST API / RFC / BAPI to Ariba
- Bi-directional write-back to SAP & MDG

→ AS IT STANDARDISES — FUTURE STATE →

Future state — SAP / MDG direct
- Aerchain onboarding + sourcing → SAP / MDG direct
- As processes standardise and Ariba is progressively retired

MULTI-TENANT, MULTI-BU BY DESIGN

One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with RBAC, dimension-based scoping, and separate authentication for shared-service entities such as the GCC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchain.

AUDIT-GRADE GOVERNANCE

Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

IN SCOPE

- ✓ Intake & orchestration for 15,000 enterprise business users
- ✓ Autonomous + strategic sourcing, intake-to-award
- ✓ Award & PO sync to Ariba / SAP S/4HANA
- ✓ Vendor onboarding + automated due diligence
- ✓ Vendor performance management
- ✓ Spend insights with live market indices
- ✓ Integration framework: Ariba + S/4HANA + MDG

OUT OF SCOPE / LATER PHASES

- ○ Third-party catalog aggregation / L2 punch-out (Ariba-native)
- ○ P2P, GRN and AP automation — already on SAP; available as a future expansion lane
- ○ Contract redlining / track-changes authoring (roadmap)
- ○ MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service
- ○ Per-additional-SAP-instance onboarding beyond Wave 1 (rate-carded)

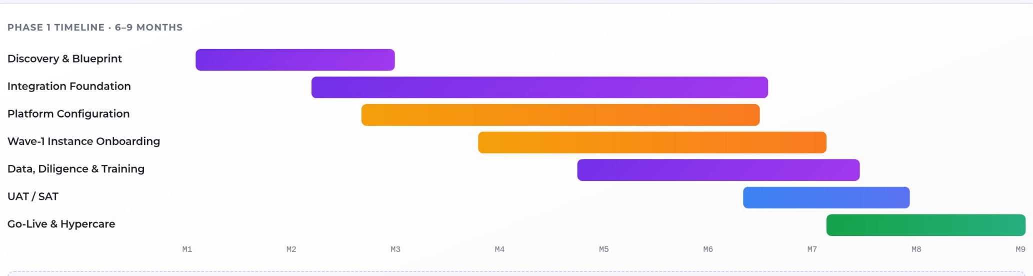

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Ariba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 14 toward 18 instances.

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN

- **WAVE 1 · MONTHS 0–9 — Land — priority entities:** Vendor onboarding + automated due diligence + autonomous sourcing on 2–3 categories, live across 3–4 priority SAP instances. Platform available group-wide from day one for spend visibility and reporting. Human-in-the-loop sourcing.
- **WAVE 2 · YEAR 2 — Scale — across the estate:** Additional instances onboarded; autonomous sourcing widened by category; vendor performance management and spend insights deepened across more of the 24 businesses. Confidence-threshold auto-award introduced.
- **WAVE 3 · YEAR 3+ — Standardise — group-wide:** Full coverage across all activated instances (toward 18). Progressive transition to SAP-direct where Ariba is retired. Expansion lanes — downstream P2P/AP, broader strategic-spend coverage, MDM rationalisation — activated as agreed.

PHASE 1 TIMELINE · 6–9 MONTHS

A live demonstration on Adani's actual data follows within two weeks of scoping confirmation. A greenfield deployment is 3–4 months; at Adani's multi-instance scale we plan to 9 to absorb integration depth and master-data complexity.

DELIVERY TEAM — A SENIOR, SAP-FLUENT POD

PL	IA	PC	ML	QA	CS
PROGRAMME LEAD	INTEGRATION ×2	PRODUCT ×3	AI / ML	QUALITY	CUSTOMER SUCCESS
Programme Lead	**Integration Architects**	**Product Consultants**	**AI / ML Engineer**	**QA Lead + Engineers**	**Customer Success Manager**
End-to-end accountability · primary POC	Ariba / S/4HANA / MDG APIs, multi-instance	Per-BU configuration & orchestration	Agent config, negotiation & risk models	SAT / UAT across instances	Day-1 hypercare & governance

INTEGRATION PROGRAM — WHAT MAKES ADANI DIFFERENT

A single-instance SAP integration is routine. Adani's distinction is the **connector framework built once** across Ariba + S/4HANA + MDG, then replicated per instance at a declining unit cost as the estate is onboarded wave by wave. This is why integration is scoped as its own program line — not buried in subscription — and why per-additional-instance onboarding beyond Wave 1 carries a fixed, predictable rate.

Bi-directional connectors · Front-end configurable · Webhook write-back · No back-end dev · Multi-realm / multi-currency

Co-delivery with Adani's chosen SI partner (Accenture, IBM, or others already in the estate) is fully supported — Aerchain provides the platform and agent technology; the SI can own advisory, change management and SAP-side integration, as at Unilever.

5 Commercial Proposal

YEAR 1 INVESTMENT SUMMARY

Aerchain Agentic Procurement Layer — Adani Group Deployment

$950,000 — Platform Subscription — per year · Modules 1–3 (enterprise licence)

$750,000 — Implementation & Integration — one-time (Phase 1)

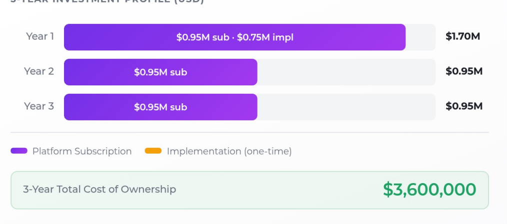

Year 1 Total Investment **$1,700,000**

MODULE-BY-MODULE PRICING BREAKDOWN

MODULE	PLATFORM FEE (SAAS / YR)	IMPLEMENTATION (ONE-TIME)	PHASE
Module 1 — Vendor Onboarding & Management	$190,000	$150,000	Phase 1
Module 2 — Intake & Orchestration	$332,500	$262,500	Phase 1
Module 3 — Sourcing & Negotiation	$427,500	$337,500	Phase 1
Module 4 — P2P Automation	Future	Future	Future
Phase 1 Total — Modules 1–3	**$950,000**	**$750,000**	

Platform fees are annual SaaS; implementation is one-time. Module allocation follows a 2 : 3.5 : 4.5 weighting across Modules 1–3. Year 1 = platform + implementation ($1,700,000); Years 2–3 = platform only ($950,000), price-locked.

3-YEAR INVESTMENT PROFILE (USD)

3-Year Total Cost of Ownership **$3,600,000**

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3
Platform Subscription	$0.95M	$0.95M	$0.95M
Implementation & Integration	$0.75M	—	—
Total	**$1.70M**	**$0.95M**	**$0.95M**

IMPLEMENTATION BREAKDOWN

Core Implementation — $474K · Integration (Ariba/S4/MDG) — $146K · QA & Validation — $80K · Customer Success — $50K

3-Year Total Contract Value: $3,600,000 · Multi-year commitment eligible for 5–10% discount

Subscription priced as a phased enterprise ramp tied to wave activation; locked at signing, no mid-term escalation. Per-additional-instance onboarding beyond Wave 1 priced separately.

TWO COMMERCIAL STRUCTURES

OPTION A — Enterprise Bundle (RECOMMENDED)

Full Modules 1–3 as a single commitment. Unlimited users, all 24 BUs. Price fixed for 3 years — no increase until Year 4.

Platform Subscription (SaaS)	$950,000 / yr
Implementation & Integration	$750,000
Year 1 Total	**$1,700,000**
Year 2 (Platform only)	$950,000
Year 3 (Platform only)	$950,000
3-Year Total	**$3,600,000**

Fixed at $950,000/yr for Years 1–3. From Year 4: 10% escalation per year.

OPTION B — Module-by-Module

Each module licensed independently at a 20% premium on platform fees. Same implementation cost. Activate modules at different times.

Platform Subscription (SaaS)	$1,140,000 / yr
Implementation & Integration	$750,000
Year 1 Total	**$1,890,000**
Year 2 (Platform only)	$1,140,000
Year 3 (Platform only)	$1,140,000
3-Year Total	**$4,170,000**

Option B = $950K platform × 1.20 = $1,140,000/yr. Subject to standard 10%/yr from Year 2.

Year 4+ escalation (Option A): $950,000/yr is fixed for Years 1–3 with zero escalation; +10% per annum from Year 4 — full cost certainty across the initial term.

SUBSCRIPTION OVERVIEW

ANNUAL SUBSCRIPTION	NAMED USERS	PLATFORM UPTIME SLA	PRICE LOCK
$950,000	Unlimited	99.9%	3 Years

Single platform subscription covers: full upstream agentic suite (intake & orchestration, autonomous & strategic sourcing, vendor onboarding + automated due diligence, vendor performance management, spend insights), supplier portal, analytics dashboard, Ariba + SAP S/4HANA + MDG integration, all AI capabilities, cloud hosting (SOC 1/2 · ISO 27001 · GDPR), product upgrades, standard support, and dedicated Customer Success Manager. Group-wide enterprise license — no per-region, per-user, or per-transaction uplift.

EVERYTHING INCLUDED IN THE ANNUAL SUBSCRIPTION

- **Aerchain Platform** — Full upstream agentic suite from Day 1 — intake & orchestration, autonomous & strategic sourcing, onboarding + due diligence, VPM, spend insights. ✓ Included
- **Unlimited Named User Licences** — Enterprise licence active from Day 1 — all 15,000 intake users + procurement core. No per-seat uplift. ✓ Included
- **SAP / Ariba / MDG Connectors** — Pre-built bi-directional integration. No additional integration licensing. ✓ Included
- **Group-Wide Coverage** — Platform accessible across all business units from Day 1 for spend analytics, supplier visibility & reporting. ✓ Included
- **Unlimited Supplier Access** — No per-supplier fees. All Adani suppliers onboarded free. Unlimited evaluator access. ✓ Included
- **Upgrades + Hosting + Dedicated CSM** — Product upgrades, cloud hosting (AWS Mumbai · BYOC supported), dedicated CSM. Price-locked 3 years. ✓ Included

GLOBAL ENTERPRISE LICENCE — ACTIVE FROM DAY 1

The platform subscription is a **single group-wide enterprise licence** with a **3-year price lock and no escalation**. While implementation is phased by wave and instance for change management, the licence itself is not gated — all business units can access the platform from Day 1 for spend analytics, supplier visibility, and reporting. As additional instances activate across waves, there are no additional licensing fees, no uplift beyond the agreed ramp, and no renegotiation. Only the implementation services and per-additional-instance onboarding are scoped and priced separately.

KEY COMMERCIAL TERMS

Subscription Commencement	12-month tenure starts from Implementation Kick-Off Date. Group-wide platform license across all business units.
Billing	Annual subscription and implementation both billed in advance from the project kick-off date. Subscription tenure commences from kick-off.
Payment Terms	Net 30
Travel & Expenses	Charged on actuals; Adani pre-approval required
Taxes	Not included; applicable taxes charged separately per jurisdiction
Proposal Validity	60 days from date of submission
Supplier Access Fees	None — all Adani suppliers access the platform at no additional cost
Out of Scope	Third-party catalog / L2 punch-out (Ariba-native), downstream P2P / GRN / AP automation, and contract redlining. Per-additional-instance onboarding beyond Wave 1 requires separate implementation scoping.

6 Implementation Rate Card & Add-On Services

PROJECT SCOPE — LARGE ENTERPRISE

Upstream Agentic Procurement — Phase 1 (Priority Entities)

Duration: **6–9 months**

✓ WHAT'S INCLUDED

- Advisory & Blueprint
- Core Implementation
- Integration Setup (Ariba / S4 / MDG)
- Testing & Enablement
- Hypercare Support (90 days)
- Standard Training
- Data Migration & Supplier Onboarding

✗ NOT INCLUDED

- Per-additional-SAP-instance onboarding beyond Wave 1 (rate-carded)
- Third-party catalog / L2 punch-out (Ariba-native)
- Downstream P2P / GRN / AP automation
- Contract redlining / track-changes authoring
- MDG master-data rationalisation / dedup
- Extended hypercare beyond 90 days (add-on)
- Custom Product Development & Innovation (charged on actuals per rate card)

STANDARD IMPLEMENTATION — GRAND TOTAL — Core Implementation · Integration (Ariba/S4/MDG) · QA & Validation · Customer Success — **$750,000** PHASE 1 · PRIORITY ENTITIES

CORE IMPLEMENTATION — Advisory, blueprint, and core product configuration — **$474,000**

ROLE	PHASES	HC	RATE/MO	MO	COST
SA — Solution Architect	Advisory	1	$15K	2	**$30K**
PgL — Programme Lead	Full Project	1	$13K	7	**$91K**
PC — Product Consultant	Advisory, Build	3	$9K	5	**$135K**
APC — Assoc. Product Consultant	Advisory, Build, Validation	3	$8K	5	**$120K**
MLE — AI / ML Engineer	Build	1	$12K	4	**$48K**
RKE — Due-Diligence & Risk Integration	Build	1	$10K	5	**$50K**

PRODUCT DEV & INNOVATION ⚠ Charged on Actuals — Custom development, AI models, and platform extensions — not included in standard $750K — **T&M**

ROLE	PHASES	HC	RATE/MO	MO	INDICATIVE
AIL — AI Lead	Dev	1	$14K	3	$43K
AIE — AI Engineer	Dev	1	$10K	3	$30K
PM — Project Manager	Dev	1	$9K	3	$26K
UX — UX Designer	Dev	1	$7K	3	$22K
ETL — ETL Developer	Dev	1	$7K	3	$22K
DEV — Developer	Dev	6	$7K	3	$130K

Note: Product Dev & Innovation team is excluded from the standard $750K implementation. These services are engaged only if scope requires custom AI model development or platform extensions, and are charged at actuals per signed Change Order.

INTEGRATIONS — ERP integration — Ariba / S4 / MDG — **$146,000**

ROLE	PHASES	HC	RATE/MO	MO	COST
INL — Integration Lead	Build	1	$11K	6	**$66K**
INE — Integration Engineer	Build	2	$8K	5	**$80K**

QA & VALIDATION — UAT, SAT, and integration testing — **$80,000**

ROLE	PHASES	HC	RATE/MO	MO	COST
QA — QA Lead	Validation	1	$11K	4	**$44K**
QE — QA Engineer	Validation	2	$6K	3	**$36K**

CSM — Customer Success Manager	Hypercare	1	$12K	3	**$36K**
SE — Support Engineer	Hypercare	1	$7K	2	**$14K**

Standard Implementation — Product Dev & Innovation excluded — charged on actuals if scope requires new development — **$750,000**

ADD-ON SERVICES

Everything beyond standard scope is priced as an add-on. Select as needed. All add-ons require a signed Change Order prior to commencement.

Service	Description	Price
Additional SAP Instance Onboarding	Per instance beyond Wave 1	$45K/instance
MDG Master-Data Rationalisation	OEM/dealer tagging, dedup	Scoped
Additional User Block	Beyond 15,000, per 5,000 users	Per 5,000
Extended Hypercare	CSM + Support beyond standard period	$28K/month
Additional Training Sessions	Beyond standard enablement sessions	$5K/session
Downstream P2P / AP Expansion	Procure-to-Pay, GRN, AP automation	Separate terms
Change Request (Scope Addition)	T&M at rate card rates, quoted per CR	~$15K/CR
Travel & Expenses	Pre-approval required; charged on actuals	Actuals

Note: All add-on services require a signed Change Order prior to commencement. Travel & Expenses are charged at cost; Adani pre-approval required. Per-additional-instance onboarding and downstream P2P/AP expansion scoped and priced upon request.

7 Value & Next Steps

THE ECONOMICS

The fee is a rounding error against the value at stake

- **~$5B — Addressable tactical + tail:** Phase-1 wedge of the $20B Ariba spine. A 2–3% efficiency gain here is $100–150M a year — against a roughly $1M annual fee.
- **AI-led — Governed vendor due diligence:** Sanctions, adverse-media and financial / legal risk scored against a configurable, per-BU risk appetite — replacing slow external diligence and the email-based blacklist with a governed, auditable engine.
- **≥ 70% — Faster vendor onboarding:** Committed improvement on the current baseline — collapsing a slow, multi-owner, multi-system process into a single governed flow.

For reference, a 1% improvement across the full $20B routed through Ariba is $200M — the group-expansion thesis as autonomous sourcing widens from tactical into strategic spend.

NEXT STEPS

- ✓ **Integration architecture document** — Ariba / SAP / MDG, with the layered "sit-on-top, then SAP-direct" model. Delivered.
- ✓ **Vendor-onboarding working session** — convened with Devesh's team; integration team aligned.
- ✓ **Should-cost challenge** — share a real awarded project (BOQ + final cost) and we will return an AI-generated estimate to compare.
- → **Live demonstration on Adani data** — within two weeks of scoping confirmation.
- → **Group CPO virtual review** — once Suresh Shinde has reviewed this proposal.
- → **Phase-1 deployment** — within Wave-1 window of signature.

AERCHAIN

Make the $20B already flowing through Ariba 10–15% more effective — with an AI agent layer that closes the gaps SAP cannot, in this release cycle.
