TECHNICAL & COMMERCIAL PROPOSAL · FULL SOURCE-TO-PAY · JUNE 2026 · AERCHAIN × ADANI GROUP

The **Agentic Procurement** Layer for Adani Group

A full, AI-native **Source-to-Pay** platform — vendor onboarding, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — sitting on top of your Ariba, MDG and SAP estate, delivered with **Infosys** as System Integrator across the 14→18-instance group.

PREPARED FOR	ENGAGEMENT	ESTATE	HOSTING
Suresh Shinde, Group CPO Devesh Khandelwal, GM	Full Source-to-Pay Modules 1–4 · with Infosys SI	14 → 18 SAP S/4HANA MDG · Ariba · group-wide	AWS Mumbai default BYOC supported

Prepared by **Gaurav K. Guha**, Head of Sales, Aerchain · gaurav.guha@aerchain.io · +91 96195 04839

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — the only Indian platform that carries both a full source-to-pay suite and a best-in-class autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Ariba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty

Co-Founder & CEO

BITS Pilani | EX BOSCH

BITS Pilani. Built SupplyBasics (B2B commerce) before founding Aerchain in 2019. 10+ years in procurement & supply chain.

Himavanth Jasti

Co-Founder & CTO

BITS Pilani | EX BANK OF AMERICA practo

Founding engineering. Platforms built at scale across fintech, health-tech and HR-tech. ~80% founding-team retention to date.

CAPITAL & BACKING · $16M RAISED

Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** seed + Series A re-investor; Season Two Ventures (seed).

PROOF AT CONGLOMERATE SCALE

Live where it matters most

The Reliance Group runs Aerchain source-to-contract group-wide — SAP + Ariba integrated, live across hydrocarbons, O2C and manufacturing, rolling out company by company. The directly relevant precedent for Adani's multi-entity, SAP-heavy estate.

- Reliance Group · S2C group-wide
- Unilever · autonomous sourcing on Coupa
- AB InBev
- Danone
- Meta · auctions
- JDE Peet's
- Emirates Global Aluminium
- NSE · BYOC
- CenturyPly

WHERE AERCHAIN IS DIFFERENT

AI-native, not bolted on
Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.

Full suite + autonomous sourcing
Everything Ariba, Coupa, Zycus, Jaggaer and GEP do — plus the autonomous-sourcing depth of Fairmarkit, Keelvar and Pactum. They each hold a fraction; we hold the whole.

SAP-native by design
Bi-directional S/4HANA, ECC and Ariba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

2 Understanding Adani's Requirement

Adani is one of India's most mature SAP customers. The estate is largely built; the next move is intelligence, not integration. This proposal maps directly to the two priorities surfaced on 27 May: a faster, governed vendor-onboarding and due-diligence process, and an autonomous sourcing layer for the tactical and tail spend — both sitting on top of Ariba, MDG and SAP.

Ariba Spend
$20B+
Through Ariba annually

Purchase Orders
~100K
Per year

Operating Businesses
24+
Group-wide

SAP Instances
14→18
Growing via M&A

THE ESTATE, AS IT STANDS

SAP-heavy, well-consolidated, MDG-governed

- **ERP:** SAP S/4HANA — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- **Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under SOX; objects are created once and synced, never duplicated.
- **Procurement:** SAP Ariba group-wide since 2021 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted; SLP, Contracts and Spend Analysis adoption is mixed.
- **Network:** SAP Business Network for vendor transactions.

THE SPEND, WHERE WE WIN

Strategic stays; we take the tactical & tail

Of the $20B+ routed through Ariba, the strategic core is well served. The opportunity is the slice where Ariba's transactional spine hits its limits — high-volume, lower-value spend with no human bandwidth for competitive bidding, and the ~70% of vendors who sit in the tail.

Strategic · bulk commodities, EPC, capex, fuels	Ariba retains
Tactical · MRO, services, logistics, mid-value capex	**Aerchain**
Tail · indirect, plant-local, MSME, ad-hoc	**Aerchain**

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

Slow & fragmented today

A deliberately stricter onboarding process — built to de-risk bad vendors — has become very lengthy. No single owner; the vendor is spread across SAP, Ariba and MDG. Blocking and blacklisting still run over email.

Costly third-party diligence

The current TBDT process — adverse media, financial, legal and business risk — is commercially expensive and externally dependent, with no configurable per-BU risk appetite.

Unstructured master data

No structured OEM-vs-dealer tagging in MDG (SKF, Schaeffler, NSK and their channel partners), and multiple codes per item — so AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES

Layer on Ariba/MDG/SAP now; transition toward SAP-direct as the estate standardises

Phase 1, Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Ariba, writing back to SAP and MDG. As the estate grows from 14 toward 18 instances and processes standardise over time, the same orchestration layer migrates progressively to SAP-direct where Ariba is retired — without forcing a rip-and-replace at any point. This mirrors the Reliance and Unilever "sit on top, then expand" pattern already in production.

Honest scope boundaries. Aerchain is a technology platform, not a catalog aggregator — third-party marketplace (L2 punch-out) integration into your Ariba is already handled natively by Ariba and is not part of this proposal. Contract redlining / track-changes authoring is on our roadmap, not in current scope; we generate contracts from awards and hold the rate-contract repository today. Atlas (the conversational agent) reaches general availability shortly and is positioned as an enablement layer, not a Phase-1 dependency.

3 Solution Scope

An upstream agentic procurement suite, governed and SAP-native: request capture for every business user, autonomous and strategic sourcing through to award and PO sync, AI vendor onboarding with automated due diligence, vendor performance management, and live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS

1 **Platform Subscription (SaaS)** — the full Source-to-Pay suite (Modules 1–4): Vendor Onboarding & Management, Intake & Orchestration, Sourcing & Negotiation, and P2P & AP Automation. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.

2 **Implementation & Integration Services** — deploy all three modules: configuration, SAP S/4HANA / Ariba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Module 1 — Vendor Onboarding & Management
Module 2 — Intake & Orchestration
Module 3 — Sourcing & Negotiation
Enterprise Integration (SAP / Ariba / MDG)
Infosys — System Integrator
Module 4 — P2P & AP Automation

Phase 1 landing scope: Vendor onboarding with AI-assisted due diligence as the wedge + autonomous sourcing for tactical and tail spend + strategic sourcing orchestration over the existing Ariba / SAP / MDG estate. Integration is a dedicated program line — not bundled into platform fees.

UPSTREAM AGENTIC SUITE — IN SCOPE

Intake & Orchestration

Enterprise-wide request capture for **15,000 business users** via a single co-pilot — sourcing, contract, onboarding or invoice requests, with AI auto-classification and policy-based routing. Zero procurement training for requesters.

Autonomous & Strategic Sourcing

From a vague intake to a complete RFQ — SOW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable autonomy per category: suggest, co-pilot, or full-auto. Human-in-the-loop for the first months, then touchless.

Negotiation, Award & PO Sync

Multi-round autonomous negotiation (discovery → benchmark pressure → target push) with a transparent should-cost model. Natural-language award scenarios. Award/PO written back to Ariba and SAP S/4HANA via API.

Vendor Onboarding + Due Diligence

AI-assisted registration (buyer-initiated or self-service), GST/PAN/MCA validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain's own AI signal aggregation against a configurable, per-BU risk appetite.

Vendor Performance Management

Vendor 360 enriched from GRN data — delivery performance, spend trend, price indices, every PO — plus web/news/compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, tier-change), with scheduled recertification.

Spend Insights

Category dashboards with live market indices — steel with contract-lock signals, ocean freight benchmarked with a disruption monitor, lubricants priced off crude / base-oil / SN-150 / SN-500 formulas — plus geopolitical supply-risk analysis.

MODULE-BY-MODULE SCOPE & CAPABILITIES

Each module is independently licensable. Phase 1 covers Modules 1–3; Module 4 (P2P) is a committed future lane — separate terms at activation.

1 Vendor Onboarding & Management ✓ Phase 1

Vendor Risk & TPDD · Vendor 360 · Performance

- AI onboarding portal
- AI doc extraction
- GST / MSME matching
- Sanctions & adverse media
- Financial & legal risk
- Per-BU risk config
- Vendor 360 & AVL
- CAPA & VPE scorecards

2 Intake & Orchestration ✓ Phase 1

Request capture · AI routing · PR-to-PO

- Co-pilot for 15,000 users
- AI auto-classification
- PR-to-PO tracker
- Policy-based routing
- Multi-BU RBAC
- Immutable audit ledger
- Spend insights (live indices)
- Atlas conversational agent

3 Sourcing & Negotiation ✓ Phase 1

Strategic + Autonomous · e-Auction · NFA

- RFx & two-envelope
- AI TBER & CS
- e-Auction amenability
- Autonomous tactical / tail
- Multi-round negotiation agent
- Should-cost (live indices)
- NFA & DoA routing
- Award write-back to Ariba / SAP

4 P2P Automation ✓ Phase 2

PR-to-PO · Invoice OCR · 2/3-way match · AP

- PO lifecycle & GRN
- 3-way match
- Invoice OCR
- 2 / 3-way match
- Exception handling
- Payment release

INTEGRATION ARCHITECTURE — CONFIGURED AT THE OBJECT AND INTERFACE LEVEL, NOT CUSTOM-CODED

Today

SAP / Ariba / MDG

- SAP S/4HANA — PR & vendor master
- Ariba — onboarding front end + guided buying
- MDG — master data (no OEM/dealer tag)

REST / RFC / BAPI →

PHASE 1 LAYER ON TOP

Phase 1 — Aerchain

AI front end + write-back

- AI onboarding & due diligence
- Autonomous & strategic sourcing
- REST API / RFC / BAPI to Ariba
- Bi-directional write-back to SAP & MDG

AS IT STANDARDISES →

FUTURE STATE

Future state

SAP / MDG direct

- Aerchain onboarding + sourcing → SAP / MDG direct
- As processes standardise and Ariba is progressively retired

MULTI-TENANT, MULTI-BU BY DESIGN

One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with RBAC, dimension-based scoping, and separate authentication for shared-service entities such as the GCC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchain.

AUDIT-GRADE GOVERNANCE

Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

IN SCOPE

- ✓ Intake & orchestration for 15,000 enterprise business users
- ✓ Autonomous + strategic sourcing, intake-to-award
- ✓ Award & PO sync to Ariba / SAP S/4HANA
- ✓ Vendor onboarding + automated due diligence
- ✓ Vendor performance management
- ✓ Spend insights with live market indices
- ✓ Integration framework: Ariba + S/4HANA + MDG

OUT OF SCOPE / LATER PHASES

- ○ Third-party catalog aggregation / L2 punch-out (Ariba-native)
- ○ Legacy non-SAP ERP integration beyond the Ariba / S4 / MDG estate (scoped separately)
- ○ Contract redlining / track-changes authoring (roadmap)
- ○ MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service
- ○ Per-additional-SAP-instance onboarding beyond Wave 1 (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Ariba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 14 toward 18 instances.

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN

WAVE 1 · MONTHS 0–9

Land — priority entities

Vendor onboarding + automated due diligence + autonomous sourcing on 2–3 categories, live across 3–4 priority SAP instances. Platform available group-wide from day one for spend visibility and reporting. Human-in-the-loop sourcing.

WAVE 2 · YEAR 2

Scale — across the estate

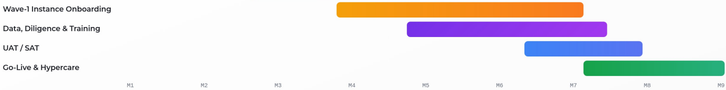
Additional instances onboarded; autonomous sourcing widened by category; vendor performance management and spend insights deepened across more of the 24 businesses. Confidence-threshold auto-award introduced.

WAVE 3 · YEAR 3+

Standardise — group-wide

Full coverage across all activated instances (toward 18). Progressive transition to SAP-direct where Ariba is retired. Expansion lanes — downstream P2P/AP, broader strategic-spend coverage, MDM rationalisation — activated as agreed.

PHASE 1 TIMELINE · 6–9 MONTHS



A live demonstration on Adani's actual data follows within two weeks of scoping confirmation. A greenfield deployment is 3–4 months; at Adani's multi-instance scale we plan to 9 to absorb integration depth and master-data complexity.

INTEGRATION PROGRAM — WHAT MAKES ADANI DIFFERENT

A single-instance SAP integration is routine. Adani's distinction is the **connector framework built once** across Ariba + S/4HANA + MDG, then replicated per instance at a declining unit cost as the estate is onboarded wave by wave. This is why integration is scoped as its own program line — not buried in subscription — and why per-additional-instance onboarding beyond Wave 1 carries a fixed, predictable rate.

Bi-directional connectors · Front-end configurable · Webhook write-back · No back-end dev · Multi-realm / multi-currency

Co-delivery with Adani's chosen SI partner (Accenture, IBM, or others already in the estate) is fully supported — Aerchain provides the platform and agent technology; the SI can own advisory, change management and SAP-side integration, as at Unilever.

5 Commercial Proposal — Full Source-to-Pay

This extends the upstream proposal into the **full Source-to-Pay** scope. Modules 1–3 pricing is unchanged; Module 4 (P2P & AP Automation) is now priced, bringing the group-wide platform subscription to **$2.1M / year**. Implementation is delivered with **Infosys as System Integrator**.

YEAR 1 INVESTMENT SUMMARY — FULL S2P (MODULES 1–4)

Aerchain Agentic Source-to-Pay Platform — Adani Group, delivered with Infosys as System Integrator

$2,100,000
Platform Subscription — per year · full S2P (Modules 1–4)

$2,350,000
Implementation, Year 1 — Aerchain $1.15M + Infosys SI $1.20M

Year 1 Total Investment **$4,450,000**

MODULE-BY-MODULE PRICING BREAKDOWN — FULL S2P

MODULE	PLATFORM FEE (SAAS / YR)	IMPLEMENTATION (ONE-TIME)	PHASE
Module 1 — Vendor Onboarding & Management	$190,000	$150,000	Phase 1
Module 2 — Intake & Orchestration	$332,500	$262,500	Phase 1
Module 3 — Sourcing & Negotiation	$427,500	$337,500	Phase 1
Module 4 — P2P & AP Automation · highest transaction volume	$1,150,000	$400,000	Phase 2
Full S2P Total — Modules 1–4	**$2,100,000**	**$1,150,000**	

Platform fees are annual SaaS; implementation is one-time (Aerchain, excludes the Infosys SI add-on). Modules 1–3 are unchanged from the upstream proposal. Module 4 (P2P & AP) is the highest-transaction-volume module — PR-to-PO, invoice OCR, 2/3-way match and AP automation across ~100K POs and a larger invoice base, all 24 BUs, with SAP write-back. Years 2–3 = platform only ($2,100,000), price-locked.

> **Internal cost transparency — the AI (token) cost inside the fee.** Of the $2,100,000 annual platform fee, approximately **$804,000 / year (~$67K / month, ~$2.68 / cycle)** is Aerchain's internal AI operating (token) cost to run the full autonomous intake-to-pay agent stack across ~300,000 procurement cycles — carried by Aerchain as a fixed internal cost, never billed per token or per cycle. The agent-by-agent derivation is in the companion *Aerchain × Adani — Tokenization & AI Operating-Cost* document.

3-YEAR INVESTMENT PROFILE (USD)

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3

3-Year Total Cost of Ownership **$8,650,000**

Platform Subscription (S2P)	$2.10M	$2.10M	$2.10M
Implementation — Aerchain	**$1.15M**	—	—
System Integrator — Infosys (1 yr)	**$1.20M**	—	—
Total	**$4.45M**	**$2.10M**	**$2.10M**

3-Year Total Contract Value: $8,650,000 · Platform price-locked for 3 years

Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchain) and the Infosys SI add-on are one-time, Year-1 only. Per-additional-instance onboarding beyond Wave 1 priced separately.

TWO COMMERCIAL STRUCTURES

OPTION A

RECOMMENDED

Enterprise Bundle

Full S2P (Modules 1–4) as a single commitment. Unlimited users, all 24 BUs. Platform price fixed for 3 years.

Platform Subscription (SaaS)	**$2,100,000 / yr**
Implementation — Aerchain	**$1,150,000**
System Integrator — Infosys (1 yr)	**$1,200,000**
Year 1 Total	**$4,450,000**
Year 2 (Platform only)	**$2,100,000**
Year 3 (Platform only)	**$2,100,000**
3-Year Total	**$8,650,000**

Platform fixed at $2,100,000/yr for Years 1–3. From Year 4: 10% escalation per year.

OPTION B

Module-by-Module

Each module licensed independently at a 20% premium on platform fees. Same implementation & SI cost. Activate modules (incl. P2P) at different times.

Platform Subscription (SaaS)	**$2,520,000 / yr**
Implementation — Aerchain	**$1,150,000**
System Integrator — Infosys (1 yr)	**$1,200,000**
Year 1 Total	**$4,870,000**
Year 2 (Platform only)	**$2,520,000**
Year 3 (Platform only)	**$2,520,000**
3-Year Total	**$9,910,000**

Option B = $2,100,000 platform × 1.20 = $2,520,000/yr. Subject to standard 10%/yr from Year 2.

Year 4+ escalation (Option A): $2,100,000/yr is fixed for Years 1–3 with zero escalation; +10% per annum from Year 4 — full cost certainty across the initial term.

SUBSCRIPTION OVERVIEW

ANNUAL SUBSCRIPTION	SCOPE	NAMED USERS	PRICE LOCK
$2,100,000	Full S2P	Unlimited	3 Years

Single platform subscription covers the full Source-to-Pay suite (Modules 1–4): vendor onboarding + automated due diligence, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — plus supplier portal, analytics, Ariba + SAP S/4HANA + MDG integration, all AI capabilities (AI operating cost carried internally by Aerchain), cloud hosting (SOC 1/2 · ISO 27001 · GDPR), upgrades, support, and a dedicated CSM. Group-wide enterprise licence — no per-region, per-user, or per-transaction uplift.

KEY COMMERCIAL TERMS

Subscription Commencement	12-month tenure from Implementation Kick-Off. Group-wide licence across all business units and all four modules.
Billing	Annual subscription and implementation billed in advance from project kick-off. Infosys SI billed per the joint implementation-services schedule.
Payment Terms	Net 30 · milestone-linked on implementation — no upfront exceeding 20% of contract value
AI Operating Cost	Carried internally by Aerchain (~$804K/yr) within the platform fee — not billed per token or per cycle
System Integrator	Infosys engaged for a 12-month rollout add-on; scope and rate card in Section 6
Taxes	Not included; applicable taxes charged separately per jurisdiction
Proposal Validity	60 days from date of submission
Out of Scope	Third-party catalog / L2 punch-out (Ariba-native); per-additional-instance onboarding beyond Wave 1 (rate-carded); legacy non-SAP ERP integration

6 Implementation Services & System Integrator (Infosys)

Full-S2P implementation is delivered as a **joint engagement**: Aerchain owns the platform, agent configuration and the connector framework; **Infosys** is looped in as System Integrator to absorb the rollout *volume* for a year — per-instance/per-BU deployment, SAP-side integration effort, data migration, change management and support across the 14→18-instance estate.

AERCHAIN — PLATFORM IMPLEMENTATION

$1,150,000 one-time

Platform & agent configuration, the connector framework (Ariba / S4 / MDG / BTP), P2P/AP automation setup, UAT scenario development, and 90-day hypercare. Built once, replicated per instance.

INFOSYS — SYSTEM INTEGRATOR (12 MONTHS)

$1,200,000 1-year add-on

A dedicated Infosys pod handling rollout volume: per-BU deployment, SAP-side integration, data migration & vendor-master cleansing, change management, enterprise training, and L1/L2 support through the first year.

YEAR 1 IMPLEMENTATION — GRAND TOTAL

Aerchain platform implementation ($1.15M) + Infosys SI add-on, 12 months ($1.20M)

$2,350,000

AERCHAIN IMPLEMENTATION — COST BREAKDOWN

CORE IMPLEMENTATION

Advisory, blueprint & product configuration (incl. P2P/AP)

Infosys SI Add-On Subtotal (12 months)

Deployment $520K + Data $260K + Change $240K + Support $180K

$1,200,000

DELIVERY MODEL & COMMERCIALS

Engagement shape	Aerchain-led platform delivery; Infosys as System Integrator absorbing rollout volume for 12 months. Co-delivery governance under a single joint programme plan.
Aerchain scope	Platform & agent config, connector framework, P2P/AP setup, UAT, 90-day hypercare.

Infosys scope	Per-instance/per-BU deployment, SAP-side integration, data migration, change management, enterprise training, L1/L2 support.
Duration	6–9 months to Wave-1 go-live; Infosys SI add-on runs 12 months from kick-off.
Add-ons (on actuals)	Per-additional-SAP-instance onboarding beyond Wave 1 ($45K/instance); extended hypercare ($28K/month); MDG master-data rationalisation (scoped); custom development (T&M per Change Order).
Note	Infosys rates are indicative for a blended offshore/onshore pod and are confirmed jointly at scoping. All add-ons require a signed Change Order.

7 Value & Next Steps

THE ECONOMICS

The fee is a rounding error against the value at stake

~$5B

Addressable tactical + tail

Phase-1 wedge of the $20B Ariba spine. A 2–3% efficiency gain here is $100–150M a year — against a roughly $2.1M annual platform fee — a rounding error next to the value modelled in the companion business case.

AI-led

Governed vendor due diligence

Sanctions, adverse-media and financial / legal risk scored against a configurable, per-BU risk appetite — replacing slow external diligence and the email-based blacklist with a governed, auditable engine.

≥ 70%

Faster vendor onboarding

Committed improvement on the current baseline — collapsing a slow, multi-owner, multi-system process into a single governed flow.

For reference, a 1% improvement across the full $20B routed through Ariba is $200M — the group-expansion thesis as autonomous sourcing widens from tactical into strategic spend.

NEXT STEPS

- ✓ **Integration architecture document** — Ariba / SAP / MDG, with the layered "sit-on-top, then SAP-direct" model. Delivered.
- ✓ **Vendor-onboarding working session** — convened with Devesh's team; integration team aligned.
- ✓ **Should-cost challenge** — share a real awarded project (BOQ + final cost) and we will return an AI-generated estimate to compare.

- → **Live demonstration on Adani data** — within two weeks of scoping confirmation.
- → **Group CPO virtual review** — once Suresh Shinde has reviewed this proposal.
- → **Phase-1 deployment** — within Wave-1 window of signature.

AERCHAIN

Make the $20B already flowing through Ariba 10–15% more effective — with an AI agent layer that closes the gaps SAP cannot, in this release cycle.

Gaurav K. Guha · Head of Sales · gaurav.guha@aerchain.io · +91 96195 04839

AERCHAIN
