AERCHAIN

June 2026 | ● STRICTLY CONFIDENTIAL

TECHNICAL & COMMERCIAL PROPOSAL · FULL SOURCE-TO-PAY · JUNE 2026 · AERCHAIN × ADANI GROUP

The **Agentic Procurement** Layer for Adani Group

A full, AI-native **Source-to-Pay** platform — vendor onboarding, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — sitting on top of your Ariba, MDG and SAP estate, delivered with **Infosys** as System Integrator across the multi-instance group.

PREPARED FOR	ENGAGEMENT	ESTATE	HOSTING
Suresh Shinde, Group CPO Devesh Khandelwal, GM	Full Source-to-Pay Modules 1–3 · with Infosys SI	14 → 18 SAP S/4HANA MDG · Ariba · group-wide	AWS Mumbai default India residency

Prepared by **Gaurav K. Guha**, Head of Sales, Aerchain · gaurav.guha@aerchain.io · +91 96195 04839

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — one of the few platforms built in India that carries both a full source-to-pay suite and a mature autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Ariba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty

Co-Founder & CEO

BITS Pilani | EX BOSCH

BITS Pilani. Built SupplyBasics (B2B commerce) before founding Aerchain in 2019. 10+ years in procurement & supply chain.

Himavanth Jasti

Co-Founder & CTO

BITS Pilani | EX BANK OF AMERICA practo

Founding engineering. Platforms built at scale across fintech, health-tech and HR-tech. ~80% founding-team retention to date.

CAPITAL & BACKING · $16M RAISED

Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** seed + Series A re-investor; Season Two Ventures (seed).

PROOF AT CONGLOMERATE SCALE

Live where it matters most

Aerchain runs source-to-contract group-wide at a **peer Indian conglomerate** — SAP + Ariba integrated, live across multiple heavy-industry verticals, rolling out company by company. A directly relevant precedent for Adani's multi-entity, SAP-heavy estate. (Named references shared separately, under NDA.)

- 45+ enterprises live
- $45B+ spend processed
- 150K+ suppliers
- Conglomerate-scale S2C, group-wide
- SAP + Ariba integrated
- 30+ countries
- Named references under NDA

WHERE AERCHAIN IS DIFFERENT

AI-native, not bolted on

Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.

Full suite + autonomous sourcing

The upstream source-to-pay breadth associated with Ariba, Coupa, Zycus, Jaggaer and GEP, combined with the autonomous-sourcing depth of specialists like Fairmarkit, Keelvar and Pactum — brought together in one agentic layer rather than stitched across point tools.

SAP-native by design

Bi-directional S/4HANA, ECC and Ariba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

2 Understanding Adani's Requirement

Adani is one of India's most mature SAP customers. The estate is largely built; the next move is intelligence, not integration. This proposal contracts for the full source-to-pay suite, delivered as an intelligence and execution layer over the existing Ariba, MDG and SAP estate. Ariba is not displaced on day one — we start where the pain is sharpest, the two priorities surfaced on 27 May: a faster, governed vendor-onboarding and due-diligence process, and an autonomous sourcing layer for tactical and tail spend. From there, Ariba is displaced progressively as processes standardise across the group.

Ariba Spend
$20B+
Through Ariba annually

Purchase Orders

Per year

Operating Businesses
24+
Group-wide

SAP Instances
14→18
Growing via M&A

THE ESTATE, AS IT STANDS

SAP-heavy, well-consolidated, MDG-governed

- **ERP:** SAP S/4HANA — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- **Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under SOX; objects are created once and synced, never duplicated.
- **Procurement:** SAP Ariba group-wide since 2021 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted; SLP, Contracts and Spend Analysis adoption is mixed.
- **Network:** SAP Business Network for vendor transactions.

THE SPEND, WHERE WE WIN

Full scope, contracted; Ariba displaced in phases

Aerchain contracts for the full source-to-pay suite, but Ariba is displaced progressively — nothing is ripped out on day one. The fastest wins are where Ariba's transactional spine hits its limits: high-volume, lower-value spend with no human bandwidth for competitive bidding, and the ~70% of vendors who sit in the tail. We take those first, then move up toward the strategic core as the estate standardises.

Tactical · MRO, services, logistics, mid-value capex	**Phase 1 · Aerchain**
Tail · indirect, plant-local, MSME, ad-hoc	**Phase 1 · Aerchain**
Strategic · bulk commodities, EPC, capex, fuels	Phased · Ariba near-term

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

Slow & fragmented today

A stricter onboarding process, built to de-risk, has become painfully lengthy.

- No single owner — the vendor is spread across SAP, Ariba and MDG.
- Blocking and blacklisting still run over email.

Costly third-party diligence

The current TBDT process is commercially expensive and externally dependent.

- Adverse media, financial, legal and business risk — all bought out.

Unstructured master data

No structured OEM-vs-dealer tagging in MDG, and multiple codes per item.

- SKF, Schaeffler, NSK and their channel partners are indistinguishable.
- So AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES

Layer on Ariba/MDG/SAP now; transition toward SAP-direct as the estate standardises

Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Ariba, writing back to SAP and MDG — never a rip-and-replace.

- Layer on the existing Ariba / MDG / SAP estate from day one — bi-directional write-back, no back-end dev.
- As the estate grows and processes standardise, the orchestration layer migrates progressively to SAP-direct where Ariba is retired.
- Mirrors the "sit on top, then expand" pattern already in production at conglomerate scale.

3 Solution Scope

A full, agentic Source-to-Pay suite, governed and SAP-native: AI vendor onboarding with automated due diligence and relationship management; request capture, autonomous and strategic sourcing through to award, contract and PO sync; and procure-to-pay with invoice automation — all with live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS

1 Platform Subscription (SaaS)

The full Source-to-Pay suite (Modules 1–3): Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.

2 Implementation & Integration Services

Deploy all three modules: configuration, SAP S/4HANA / Ariba / MDG integration, UAT, change management, training, and 90-day hypercare.

- Module 1 — Vendor Onboarding & Relationship Management
- Module 2 — Source-to-Contract
- Module 3 — Procure-to-Pay
- Enterprise Integration (SAP / Ariba / MDG)
- Infosys — System Integrator

FULL SOURCE-TO-PAY SUITE — IN SCOPE

Enterprise Intake & Request Capture

Enterprise-wide request capture for **15,000 business users** via a single co-pilot — sourcing, contract, onboarding or invoice requests, with AI auto-classification and policy-based routing. Zero procurement training for requesters.

Autonomous & Strategic Sourcing

From a vague intake to a complete RFQ — SOW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable autonomy per category: suggest, co-pilot, or full-auto. Human-in-the-loop for the first months, becoming progressively more autonomous as confidence builds.

Negotiation, Award & PO Sync

Multi-round autonomous negotiation (discovery → benchmark pressure → target push) with a transparent should-cost model. Natural-language award scenarios. Award/PO written back to Ariba and SAP S/4HANA via API.

Vendor Onboarding + Due Diligence

AI-assisted registration (buyer-initiated or self-service), GST/PAN/MCA validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain's own AI signal aggregation.

Vendor Performance Management

Vendor 360 enriched from GRN data — delivery performance, spend trend, price indices, every PO — plus web/news/compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, tier-change), with scheduled recertification.

P2P & AP Automation

PR-to-PO tracking, GRN, invoice OCR and 2/3-way match, exception handling and AP automation — with payment status & advice made visible to the vendor.

MODULE-BY-MODULE SCOPE & CAPABILITIES

The full Source-to-Pay suite across three modules, each independently licensable — a single group-wide enterprise licence covering all three.

1 ✓ In scope

Vendor Onboarding & Relationship Management

Onboarding · TPDD · Vendor 360 · Performance

ONBOARDING & DUE DILIGENCE

- AI onboarding portal & AI doc extraction
- GST / MSME matching
- Sanctions & adverse-media + financial / legal risk

RELATIONSHIP & PERFORMANCE

- Vendor 360 & Approved Vendor List
- Block / unblock & blacklist propagation
- Performance scorecards & risk review

2 ✓ In scope

Source-to-Contract

Intake · Strategic + autonomous sourcing · e-Auction · NFA · Contract

INTAKE & SOURCING

- Request intake & auto-classification
- Policy-based routing
- RFx & two-envelope
- Autonomous tactical / tail sourcing
- Multi-round negotiation agent

EVALUATE, AWARD & CONTRACT

- AI technical & commercial bid evaluation
- e-auction amenability
- NFA & DoA routing
- Award write-back to Ariba / SAP
- Contract handoff (CLM)

3 ✓ In scope

Procure-to-Pay

PR-to-PO · GRN · Invoice OCR · 2/3-way match · AP

PR-TO-PO & RECEIPT

- PR-to-PO tracker
- PO lifecycle
- GRN

INVOICE & AP

- Invoice OCR
- 2 / 3-way match
- Exception handling
- AP automation
- Payment status & advice made visible to the vendor

MULTI-TENANT, MULTI-BU BY DESIGN

One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with RBAC, dimension-based scoping, and separate authentication for shared-service entities such as the GCC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchain.

AUDIT-GRADE GOVERNANCE

Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

IN SCOPE

- ✓ Intake & orchestration for 15,000 enterprise business users
- ✓ Autonomous + strategic sourcing, intake-to-award
- ✓ Award & PO sync to Ariba / SAP S/4HANA
- ✓ Vendor onboarding + automated due diligence
- ✓ Vendor performance management
- ✓ Procure-to-Pay & AP automation — PR-to-PO, GRN, invoice OCR, 2/3-way match
- ✓ Integration framework: Ariba + S/4HANA + MDG

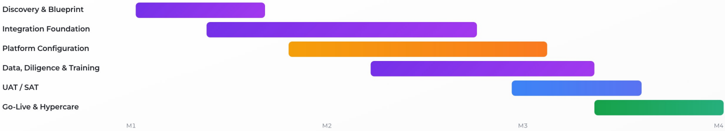
OUT OF SCOPE / LATER PHASES

- ○ Third-party catalog aggregation / L2 punch-out (Ariba-native)
- ○ Legacy non-SAP ERP integration beyond the Ariba / S4 / MDG estate (scoped separately)
- ○ Contract redlining / track-changes authoring (roadmap)
- ○ MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service
- ○ Per-additional-SAP-instance onboarding beyond the initial deployment (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Ariba, S/4HANA and MDG, then declining-cost onboarding of additional SAP instances as they are activated — landing in a contained set of priority entities first, then scaling group-wide across the estate.

IMPLEMENTATION TIMELINE · ~4 MONTHS



A live demonstration on Adani's actual data follows within two weeks of scoping confirmation. Core platform implementation across the priority estate is delivered in ~4 months, with 90-day hypercare from go-live. Additional SAP instances onboard on the pre-built, declining-cost connector framework as they are activated.

5 Commercial Proposal — Full Source-to-Pay

The full Source-to-Pay suite across **three modules** — Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay — as a single group-wide platform subscription of **$2.1M / year**, price-locked for 3 years. Implementation is delivered with **Infosys as System Integrator**.

YEAR 1 INVESTMENT SUMMARY — FULL S2P (MODULES 1–3)

Aerchain Agentic Source-to-Pay Platform — Adani Group, delivered with Infosys as System Integrator

$2,100,000
Platform Subscription / yr — full-scope licence (Modules 1–3), price-locked 3 yrs

$1,650,000
Implementation, Year 1 — Aerchain $1.15M + Infosys SI $0.50M

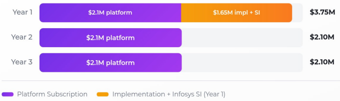
Year 1 Total Investment **$3,750,000**

MODULE-BY-MODULE PRICING BREAKDOWN — FULL S2P

MODULE	PLATFORM FEE (SAAS / YR)	IMPLEMENTATION (ONE-TIME)
Module 1 — Vendor Onboarding & Relationship Management	**$350,000**	**$150,000**
Module 2 — Source-to-Contract	**$950,000**	**$600,000**
Module 3 — Procure-to-Pay	**$800,000**	**$400,000**
Full S2P Total — Modules 1–3	**$2,100,000**	**$1,150,000**

Platform fees are annual SaaS (a single group-wide enterprise licence, unlimited users, price-locked for 3 years). Implementation is one-time (Aerchain; excludes the Infosys SI add-on). Years 2–3 = platform only ($2,100,000). **AI / token usage is billed separately, on actuals — indicative ~$400,000 / yr** (an estimate at today's AI pricing; final billing as per actuals).

3-YEAR INVESTMENT PROFILE (USD)



3-Year Total Cost of Ownership **$7,950,000**

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3
Platform Subscription (S2P)	$2.10M	$2.10M	$2.10M
Implementation — Aerchain	**$1.15M**	—	—
System Integrator — Infosys (1 yr)	**$0.50M**	—	—
Total	**$3.75M**	**$2.10M**	**$2.10M**

3-Year Total Contract Value: $7,950,000 · Platform price-locked for 3 years

Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchain) and the Infosys SI add-on are one-time, Year-1 only. AI / token usage is billed on actuals (indicative ~$400K/yr).

TWO COMMERCIAL STRUCTURES

OPTION A

RECOMMENDED

Enterprise Bundle

Full S2P (Modules 1–3) as a single commitment. Unlimited users, all 24 BUs. Platform price fixed for 3 years.

Platform Subscription (SaaS)	**$2,100,000 / yr**
Implementation — Aerchain	**$1,150,000**
System Integrator — Infosys (1 yr)	**$500,000**
Year 1 Total	**$3,750,000**
Year 2 (Platform only)	**$2,100,000**
Year 3 (Platform only)	**$2,100,000**
3-Year Total	**$7,950,000**

Platform fixed at $2,100,000/yr for Years 1–3. From Year 4: 10% escalation per year.

OPTION B

Module-by-Module

Each module licensed independently at a 20% premium on platform fees, for the flexibility of activating modules at different times.

Platform Subscription (SaaS)	**$2,520,000 / yr**
Implementation — Aerchain	**$1,150,000**
System Integrator — Infosys (1 yr)	**$500,000**
Year 1 Total	**$4,170,000**
Year 2 (Platform only)	**$2,520,000**
Year 3 (Platform only)	**$2,520,000**
3-Year Total	**$9,210,000**

Option B = $2,100,000 platform × 1.20 = $2,520,000/yr. Subject to standard 10%/yr from Year 2.

SUBSCRIPTION OVERVIEW

ANNUAL SUBSCRIPTION	SCOPE	NAMED USERS	PRICE LOCK
$2,100,000	Full S2P	Unlimited	3 Years

EVERYTHING INCLUDED IN THE ANNUAL SUBSCRIPTION

Aerchain Platform

Full Source-to-Pay suite from Day 1 — intake & orchestration, autonomous & strategic sourcing, onboarding + due diligence, VPM, P2P & AP automation, spend insights.

✓ Included

Unlimited Named User Licences

Enterprise licence active from Day 1 — all 15,000 intake users + procurement core. No per-seat uplift.

✓ Included

SAP / Ariba / MDG Connectors

Pre-built bi-directional integration. No additional integration licensing.

✓ Included

Group-Wide Coverage

Platform accessible across all 24 business units from Day 1 for spend analytics, supplier visibility & reporting.

✓ Included

Unlimited Supplier Access

No per-supplier fees. All Adani suppliers onboarded free. Unlimited evaluator access.

✓ Included

Upgrades + Hosting + Dedicated CSM

Product upgrades, cloud hosting (AWS Mumbai), dedicated CSM. Price-locked 3 years.

✓ Included

GLOBAL ENTERPRISE LICENCE — ACTIVE FROM DAY 1

The platform subscription is a **single group-wide enterprise licence** with a **3-year price lock and no escalation**. While implementation is phased across the estate for change management, the licence itself is not gated — all 24 business units can access the platform from Day 1 for spend analytics, supplier visibility, and reporting. As additional instances activate over time, there are no additional licensing fees, no uplift beyond the agreed ramp, and no renegotiation. Only the implementation services and per-additional-SAP-instance onboarding beyond the initial deployment are scoped and priced separately.

KEY COMMERCIAL TERMS

Subscription Commencement	12-month tenure from Implementation Kick-Off. Group-wide licence across all business units and all three modules.
Billing	Annual subscription and implementation billed in advance from project kick-off. Infosys SI billed per the joint implementation-services schedule.
Payment Terms	Net 30 · milestone-linked on implementation
AI / token usage	Billed separately on actuals — an estimate at today's AI pricing (indicative ~$400K/yr); final billing as per actuals
System Integrator	Infosys engaged for a 12-month rollout add-on (~$0.50M) — scope and staffing in Section 6
Taxes	Not included; applicable taxes charged separately per jurisdiction
Supplier Access Fees	None — all Adani suppliers access the platform at no additional cost
Out of Scope	Third-party catalog / L2 punch-out (Ariba-native) and contract redlining / track-changes authoring (roadmap). Per-additional-SAP-instance onboarding beyond the initial deployment requires separate implementation scoping.
Contracting	Governed by a Master Services Agreement (MSA) between Aerchain and Adani; this proposal forms the commercial schedule to that agreement
Proposal Validity	60 days from date of submission

Companion documents. This proposal covers scope, delivery and fees. The value case — savings, ROI and payback — is modelled separately in the companion **Business Case** document, and the AI / token operating-cost detail in the companion **Tokenization & AI Operating-Cost** document.

6 Implementation Services & System Integrator (Infosys)

Implementation is delivered as a **joint engagement**: Aerchain owns the platform, agent configuration and the connector framework; **Infosys** is engaged as System Integrator — a focused five-person pod for a 12-month rollout across the multi-instance estate.

AERCHAIN — PLATFORM IMPLEMENTATION

$1,150,000 one-time

Platform & agent configuration, the connector framework (Ariba / S4 / MDG / BTP), P2P/AP automation setup, UAT scenario development, and 90-day hypercare. Built once, replicated per instance.

INFOSYS — SYSTEM INTEGRATOR (12 MONTHS)

$500,000 indicative · 1-year add-on

A dedicated five-person Infosys pod — program manager, subject-matter expert, project manager and two business analysts — owning per-BU deployment, SAP-side coordination, documentation and change support through the first year.

YEAR 1 IMPLEMENTATION — GRAND TOTAL

Aerchain platform implementation ($1.15M) + Infosys SI add-on, 12 months (~$0.50M, indicative)

$1,650,000

AERCHAIN IMPLEMENTATION — COST BREAKDOWN

CORE IMPLEMENTATION

Advisory, blueprint & product configuration (incl. P2P/AP) **$700,000**

Solution & programme lead	$150,000
Product consultants (config across Modules 1–3)	$300,000
AI / ML & risk engineering	$140,000
P2P / AP automation configuration	$110,000

INTEGRATIONS

Ariba / S4 / MDG / BTP connector framework + SAP write-back **$250,000**

Integration lead & architects	$150,000
Integration engineers (multi-instance)	$100,000

QA & VALIDATION

UAT, SAT and integration testing across modules

$120,000

QA lead + engineers	$120,000

CUSTOMER SUCCESS

Post-launch support and 90-day hypercare

$80,000

CSM + support engineers	$80,000

Aerchain Implementation Subtotal

Core $700K + Integration $250K + QA $120K + Customer Success $80K

$1,150,000

INFOSYS SYSTEM INTEGRATOR — FIVE-PERSON POD, 12 MONTHS (INDICATIVE)

ROLE	HEADCOUNT	BLENDED / MONTH	ANNUAL FEE
Program Manager — governance, SteerCo, milestone & client mgmt	1	$10,833	**$130,000**
Subject-Matter Expert — procurement / SAP domain	1	$9,583	**$115,000**
Project Manager — day-to-day tracking, RAID, reporting	1	$7,917	**$95,000**
Business Analyst — BRD, test cases, config support, data governance	2	$6,667	**$160,000**
Infosys SI — total (5 people, 12 months)	**5**	**~$41,667**	**$500,000**

Indicative — not a fixed price. Rates are a blended offshore/onshore estimate benchmarked against the SI partner rate card; the final envelope is scoped and confirmed jointly with Infosys against actual staffing and engagement period.

DELIVERY MODEL & COMMERCIALS

Engagement shape	Aerchain-led platform delivery; Infosys as System Integrator (five-person pod) for 12 months. Co-delivery under a single joint programme plan.
Aerchain scope	Platform & agent config, connector framework, P2P/AP setup, UAT, 90-day hypercare.
Infosys scope	Per-BU deployment coordination, SAP-side liaison, BRD / documentation, test-case & UAT support, change & training, and L1 support during the year.
Duration	~4 months to core platform go-live on the priority estate; Infosys SI pod runs 12 months from kick-off, covering wider estate rollout and support.
Infosys SI — pricing basis	**The $0.50M figure is an approximate, indicative envelope — not a fixed price.** It is scoped and finalised against the Infosys rate card and the actual staffing required. All add-ons require a signed Change Order.

ADD-ON SERVICES — PRICED SEPARATELY

Everything beyond the full Source-to-Pay scope is priced as an opt-in add-on. Each is engaged only as needed and requires a signed Change Order prior to commencement.

Additional SAP Instance Onboarding	Per instance beyond the initial deployment	**$45K**/instance
MDG Master-Data Rationalisation	OEM/dealer tagging, dedup	**Scoped**
Extended Hypercare	CSM + Support beyond the 90-day hypercare period	**$28K**/month
Additional Training Sessions	Beyond standard enablement sessions	**$5K**/session
Change Request (Scope Addition)	T&M at rate card rates, quoted per CR	**~$15K**/CR
Travel & Expenses	Pre-approval required; charged on actuals	**Actuals**

Note: All add-on services require a signed Change Order prior to commencement. Travel & Expenses are charged at cost; Adani pre-approval required. Per-additional-SAP-instance onboarding beyond the initial deployment is scoped and priced upon request.

PRODUCT DEV & INNOVATION ⚠ Charged on Actuals

T&M

Custom development, AI models, and platform extensions — not included in the standard $1.15M implementation

ROLE	PHASES	HC	RATE/MO	MO	INDICATIVE
AIL — AI Lead	Dev	1	$14K	3	**$43K**
AIE — AI Engineer	Dev	1	$10K	3	**$30K**
PM — Project Manager	Dev	1	$9K	3	**$26K**
UX — UX Designer	Dev	1	$7K	3	**$22K**
ETL — ETL Developer	Dev	1	$7K	3	**$22K**
DEV — Developer	Dev	6	$7K	3	**$130K**

Note: Product Dev & Innovation team is excluded from the standard $1.15M implementation. These services are engaged only if scope requires custom AI model development or platform extensions, and are charged at actuals per signed Change Order.

7 Governance & RACI

RESPONSIBILITY MATRIX (RACI) — AERCHAIN-LED, INFOSYS AS SI

ACTIVITY	AERCHAIN	INFOSYS (SI)	ADANI
Programme sponsorship	C	C	A / R
Solution design & blueprint	R	C	A
Spend-data extraction & cleansing	C	R	A
Platform & agent configuration	R	C	I
SAP / Ariba / MDG integration	A / R	R	C
Per-BU / per-instance rollout	C	R	A
Change management & training	C	R	A
UAT / SAT	C	R	A / R
Go-live decision	C	C	A
Hypercare & L1 support	R	R	C

R = Responsible · A = Accountable · C = Consulted · I = Informed. Joint programme governance under a single plan; SI scope confirmed at scoping.

8 Security, Compliance & Data Residency

Enterprise-grade by default, and configured to Adani's data-residency and control requirements. Full security questionnaire and architecture available for the IT / InfoSec review.

Certifications & attestations	SOC 2 Type II · ISO 27001 · GDPR-aligned
Hosting & data residency	AWS Mumbai (ap-south-1) — data resident in India
Encryption	TLS 1.2+ in transit · AES-256 at rest
Identity & access	RBAC, dimension-based scoping, SSO / SAML 2.0, MFA; separate authentication for shared-service entities
Auditability	Immutable, tamper-evident decision ledger on every agent action — input, identity, rationale, output, ERP write-back
Security testing	Annual third-party VAPT; SAST / DAST in the delivery pipeline
Data handling	Configurable retention · PII minimisation · right-to-erasure support · no training on customer data without consent
Availability & resilience	99.9% uptime SLA; DR with agreed RPO / RTO per enterprise agreement

- SOC 2 Type II
- ISO 27001
- GDPR
- AWS Mumbai · India residency
- SSO / SAML · MFA
- AES-256 · TLS 1.2+

9 Assumptions & Dependencies

The figures in this proposal are modelled bottom-up on the assumptions below. Each is designed to be replaced with measured Adani numbers during discovery — the estimates are directional, not contractual.

KEY ASSUMPTIONS (TO BE VALIDATED)

Group procurement spend	~$20B gross; ~$12B addressable after carving out commodity/fuel pass-through and intra-group spend
Volume	~100,000 POs / year across the group (broader procurement-cycle volume is higher)
Sourcing organisation	~250 FTEs group-wide (illustrative — to be confirmed) for the capacity model
Cycle-time baseline	~24-day median P2P on complex categories (indicative — to be validated on Adani data)
Infosys SI	Five-person pod, ~$0.50M — indicative, to be scoped against the Infosys rate card and staffing
Ariba footprint	Any licence cost take-out is modelled in the companion Business Case document — to be validated against Adani's Ariba contract

ADANI DEPENDENCIES

Data & access	Timely spend-data extraction and access to SAP S/4HANA, Ariba and MDG
SPOCs	Named business & IT SPOCs per business unit; SI staffing confirmed
Scheduling	Discovery workshop scheduling; UAT resource availability
Decision gates	Sign-off at each phase gate (design, UAT-ready, go-live)

> **AI pricing.** The AI pricing reflected here is what it is **today, and is an estimate**. Final billing on AI / token usage will be **as per actuals**.

AERCHAIN

This document is confidential and intended solely for Adani Group. Pricing valid 60 days from issue and subject to finalisation on written confirmation of scope. Figures are indicative pending confirmation of activated instances, transaction volumes and integration scope.
