

The Agentic Procurement Layer for Adani Group

A full, AI-native **Source-to-Pay** platform — vendor onboarding, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — sitting on top of your Ariba, MDG and SAP estate, delivered with **Infosys** as System Integrator across the 14+18-instance group.

PREPARED FOR Suresh Shinde, Group CMO Deshesh Khandelwal, CPO	ENGAGEMENT Full Source-to-Pay Modules 1-3 - with Infosys SI	ESTATE 14 + 18 SAP S/4HANA MDG, Arriba - group-wide	HOPING AWS Mumbai default India residency
---	---	---	---

Valid for 60 days from date of issue

1 Introduction & About Aerchan

Aerchan is an AI-native spend operating system — the only Indian platform that carries both a full source-to-pay suite and a best-in-class autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Arriba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty
Co-Founder & CEO
BFSI, Pharma, Built Supplybase (B2B commerce) before founding Aerchan in 2019. 30+ years in procurement & supply chain.

Himavanth Jasti
Co-Founder & CTO
BFSI, Tech, EX BANK OF AMERICA, procto
Founding engineering, Platforms built at scale across fintech, health-tech and HR-tech. >25% founding team retention to date.

CAPITAL & BACKING - \$16M RAISED
Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** Series A re-investor; Season Two Ventures (seed).

PROOF AT CONGLOMERATE SCALE
Live where it matters most
Aerchan runs source-to-contract group-wide at a **peer Indian conglomerate** — SAP + Arriba integrated, live across multiple heavy-industry verticals, rolling out company by company. A directly relevant precedent for Adani's multi-entity, SAP-heavy estate. (Named references shared separately, under NDA.)

45+ enterprises live | \$45B+ spend processed | 150K+ suppliers
Conglomerate-scale S2C, group-wide | SAP + Arriba integrated | 30+ countries
Named references under NDA.

WHERE AERCHAN IS DIFFERENT
AI-native, not bolted on
Multi-agent orchestration runs the full intake-to award lifecycle — built AI first, not retrofitted.

Full suite + autonomous sourcing
Everything Arriba, Coupa, Zycus, Jaggaer and CEP do — plus the autonomous sourcing depth of Fairmarket, Keelvar and Pactum. They each hold a fraction; we hold the whole.

SAP-native by design
Bi-directional S/4HANA, ECC and Arriba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE
Slow & fragmented today
A stricter onboarding process, built to de-risk, has become painfully lengthy.
• No single owner — the vendor is spread across SAP, Arriba and MDG.
• Blocking and backsliding still run over email.

Costly third-party diligence
The current TBDT process is commercially expensive and externally dependent.
• Adverse media, financial, legal and business risk — all bought out.
• No configurable per-BU risk appetite.

Unstructured master data
No structured OEM-to-dealer tagging in MDG, and multiple codes per item.
• SKS, Schaeffler, NSK and their channel partners are indistinguishable.
• So AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES
Layer on Arriba/MDG/SAP now; transition toward SAP-direct as the estate standardises
Aerchan is the AI onboarding, due-diligence and sourcing front end on top of Arriba, writing back to SAP and MDG — never a rip-and-replace.
• Layer on the existing Arriba / MDG / SAP estate from day one — bi-directional write-back, no back-end dev.
• As the estate grows from 14 toward 18 instances and processes standardise, the orchestration layer migrates progressively to SAP-direct where Arriba is retired.
• Mirrors the "let on top, then expand" pattern already in production at conglomerate scale.

THE SPEND, WHERE WE WIN
Strategic stays; we take the tactical & tail
Of the \$20B+ routed through Arriba, the strategic core is well served. The opportunity is the slice where Arriba's transactional spine hits its limits — high-volume, lower-value spend with no human bandwidth for competitive bidding, and the ~70% of vendors who sit in the tail.

Strategic - bulk commodities, EPC, capex, fuels | **Arriba retains**
Tactical - MRO, services, logistics, mid-value capex | **Aerchan**
Tail - indirect, plant-local, MSME, ad-hoc | **Aerchan**

3 Solution Scope

A full, agentic Source-to-Pay suite, governed and SAP-native: AI vendor onboarding with automated due diligence and relationship management; request capture, autonomous and strategic sourcing through to award, contract and PO sync; and procure-to-pay with invoice automation — all with live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS
1 Platform Subscription (SaaS)
The full Source-to-Pay suite (Modules 1-3): Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.

Module 1 — Vendor Onboarding & Relationship Management | Module 2 — Source-to-Contract | Module 3 — Procure-to-Pay | Enterprise Integration (SAP / Arriba / MDG)
Infosys — System Integrator

2 Implementation & Integration Services
Deploy all three modules configuration, SAP S/4HANA / Arriba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Intake & Orchestration
Enterprise-wide request capture for **15,000 business users** in a single click — sourcing, contract onboarding or invoice requests with AI auto-classification and proxy-based routing. Zero procurement training for requesters.

Autonomous & Strategic Sourcing
From a vague intake to a complete RFQ — SOW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable ad-hoc per category suggest, or AI/ML, or full auto. Human-in-the-loop for the first month, then touchless.

Negotiation, Award & PO Sync
Multi-round autonomous negotiation (discovery + benchmark pressure + target push) with a transparent should-cost model. Natural-language award scenarios. Award/PO written back to Arriba and SAP S/4HANA via API.

Vendor Onboarding + Due Diligence
AI-assisted registration (buyer initiated or self service), CTRAM/KAM validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchan's own AI signal aggregation against a configurable, per-BU risk appetite.

Vendor Performance Management
Vendor 360 enriched from GRN data — delivery performance, spend history, price indices, every PO — plus web-based compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, tier-change), with scheduled recertification.

P2P & AP Automation
PR-to-PO tracking, GRN, invoice OCR and 23-way match, exception handling and AP automation — with payment status & advice made visible to the vendor.

Vendor Onboarding & Relationship Management
Onboarding, POC, vendor data
Performance
ONBOARDING & DUE DILIGENCE
• AI onboarding portal & AI doc extraction
• GST /MSME matching
• Sanctions & adverse-media / financial / legal risk
• Per-BU risk appetite
RELATIONSHIP & PERFORMANCE
• Vendor 360 & AVL
• Segmentation
• Block /unblock & blacklist propagation
• Performance scorecards & CAPA

Source-to-Contract
Intake - Strategic + autonomous sourcing
e-auction - M&A - Contract
INTAKE & SOURCING
• Request intake & auto-classification
• Policy-based routing
• AI & live-envelope
• Autonomous tactical / full sourcing
• Multi-round negotiation agent
• Should-cost with live indices
EVALUATE, AWARD & CONTRACT
• AI technical & commercial bid evaluation
• e-auction amenability
• AI/ML & Data routing
• Award write-back to Arriba / SAP
• Contract handoff (CLM)

Procure-to-Pay
PR-to-PO - GRN - Invoice OCR - 23-way match - AP
PR-TO-PO & RECEIPT
• PR-to-PO tracker
• PO lifecycle
• GRN
INVOICE & AP
• Invoice OCR
• 2 / 3-way match
• Exception handling
• AP automation
• Payment status & advice made visible to the vendor

MULTI-TENANT, MULTI-BU BY DESIGN
One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with RBAC, dimension-based scoping, and separate authentication for shared-service entities such as the GCC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchan.

AUDIT-GRADE GOVERNANCE
Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

IN SCOPE
✓ Intake & orchestration for 15,000 enterprise business users
✓ Autonomous + strategic sourcing, intake-to-award
✓ Award & PO sync to Arriba / SAP / S/4HANA
✓ Vendor onboarding + automated due diligence
✓ Vendor performance management
✓ Procure-to-Pay & AP automation — PR-to-PO, GRN, invoice OCR, 23-way match
✓ Integration framework: Arriba + S/4HANA + MDG

OUT OF SCOPE / LATER PHASES
○ Third-party catalog aggregation / L2 punch-out (Arriba-native)
○ Legacy non-SAP ERP integration beyond the Arriba / S/4 / MDG estate (scoped separately).
○ Contract redlining / track-changes automation (roadmap)
○ MDG master-data rationalisation (OEM/Dealer tagging, dedup) — available as a scoped service
○ Per-additional SAP-instance onboarding beyond Wave 1 (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Arriba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 14 toward 18 instances.

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN
WAVE 1 - MONTHS 0-6
Land — priority entities
• Vendor onboarding + automated due diligence across 3-4 priority SAP instances.
• Autonomous sourcing live on 2-3 categories.
• Platform available group-wide from day one for visibility and reporting.
• Human-in-the-loop sourcing.

WAVE 2 - MONTHS 6-9
Scale — across the estate
• Additional SAP instances onboarded.
• Autonomous sourcing widened by category.
• Vendor performance management deepened across more of the 24 businesses.
• Confidence-threshold auto-award introduced.

WAVE 3 - MONTHS 9-12
Standardise — group-wide
• Full coverage across all activated instances (toward 18).
• Downstream P2P / AP automation rolled out across the estate.
• Progressive transition to SAP-direct where Arriba is retired.
• Broader strategic-spend coverage & MDG rationalisation activated as agreed.

IMPLEMENTATION TIMELINE - ~12 MONTHS

5 Commercial Proposal — Full Source-to-Pay

The full Source-to-Pay suite across **three modules** — Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay — as a single group-wide platform subscription of **\$2.1M / year**, price-locked for 3 years. Implementation is delivered with **Infosys as System Integrator**.

YEAR 1 INVESTMENT SUMMARY — FULL S2P (MODULES 1-3)
Aerchan Agentic Source-to-Pay Platform — Adani Group, delivered with Infosys as System Integrator
\$2,100,000
Platform Subscription / yr — full scope licence (Modules 1-3, price-locked 3 yrs)
Year 1 Total Investment
\$3,750,000
\$1,650,000
Implementation, Year 1 — Aerchan \$120M + Infosys \$1,530,000

MODULE	PLATFORM FEE (SaaS / YR)	IMPLEMENTATION (ONE-TIME)
Module 1 — Vendor Onboarding & Relationship Management	\$350,000	\$150,000
Module 2 — Source-to-Contract	\$950,000	\$600,000
Module 3 — Procure-to-Pay	\$800,000	\$400,000
Full S2P Total — Modules 1-3	\$2,100,000	\$1,150,000

Platform fees are annual SaaS (a single group-wide enterprise licence, unlimited users, price-locked for 3 years). Implementation is one-time (Aerchan; excludes the Infosys SI add-on). Years 2-3 — platform only (\$2100,000). AI / token usage is billed separately on actuals — indicative - \$400,000 / yr (an estimate at today's AI pricing; final billing to be per actuals).

3-YEAR INVESTMENT PROFILE (USD)
Year 1: \$2.1M platform + \$1.15M imp + 12 = \$3.75M
Year 2: \$2.1M platform = \$2.10M
Year 3: \$2.1M platform = \$2.10M
3-Year Total Cost of Ownership: \$7,950,000

YEAR-BY-YEAR BREAKDOWN
COMPONENT | Y1 | Y2 | Y3
Platform Subscription (S2P) | \$2.10M | \$2.10M | \$2.10M
Implementation — Aerchan | \$1.15M | — | —
System Integrator — Infosys (1 yr) | \$0.50M | — | —
Total | **\$3.75M** | **\$2.10M** | **\$2.10M**
3-Year Total Contract Value: \$7,950,000 - Platform price-locked for 3 years
Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchan) and the Infosys SI add-on are one-time, Year 1 only. AI / token usage is billed on actuals (indicative - \$400K/yr).

TWO COMMERCIAL STRUCTURES
OPTION A
Enterprise Bundle
Full S2P (Modules 1-3) as a single commitment, Unlimited users, all 24 BUs, Platform price fixed for 3 years.
Platform Subscription (SaaS) | \$2,100,000 / yr
Implementation — Aerchan | \$1,150,000
System Integrator — Infosys (1 yr) | \$500,000
Year 1 Total | **\$3,750,000**
Year 2 (Platform only) | \$2,100,000
Year 3 (Platform only) | \$2,100,000
3-Year Total | **\$7,950,000**
Platform fixed at \$2,100,000/yr for Years 1-3. From Year 4, 10% escalation per year.

OPTION B
Module-by-Module
Each module licensed independently at a 20% premium on platform fees, for the flexibility of activating modules at different times.
Platform Subscription (SaaS) | \$2,520,000 / yr
Implementation — Aerchan | \$1,500,000
System Integrator — Infosys (1 yr) | \$500,000
Year 1 Total | \$4,520,000
Year 2 (Platform only) | \$2,520,000
Year 3 (Platform only) | \$2,520,000
3-Year Total | \$7,560,000
Option B = \$2,100,000 platform + 120 = \$2,520,000/yr. Subject to standard 10%/yr from Year 2.

SUBSCRIPTION OVERVIEW
ANNUAL SUBSCRIPTION | **\$2,100,000**
SCOPE | **Full S2P**
NAMED USERS | **Unlimited**
PRICE LOCK | **3 Years**

KEY COMMERCIAL TERMS
Subscription Commencement | 12-month tenure from Implementation Kick-off. Group-wide licence across all business units and all three modules.
Billing | Annual subscription and implementation billed in advance from project kick-off. Infosys SI billed per the joint implementation-services schedule.
Payment Terms | Net 30 - milestone-linked on implementation — no upfront exceeding 20% of contract value
AI / token usage | Billed separately on actuals — an estimate at today's AI pricing (indicative - \$400K/yr); final billing as per actuals
System Integrator | Infosys engaged for a 12-month rollout add-on (~\$500M) — scope and staffing in Section 6
Taxes | Not included; applicable taxes charged separately per jurisdiction
Proposal Validity | 60 days from date of submission

IMPLEMENTATION SERVICES & SYSTEM INTEGRATOR (Infosys)
Implementation is delivered as a **joint engagement**: Aerchan owns the platform, agent configuration and the connector framework; **Infosys** is engaged as System Integrator — a focused five-person pod for a 12-month rollout across the 14+18-instance estate.

AERCHAN — PLATFORM IMPLEMENTATION
\$1,150,000 one-time
Platform & agent configuration, the connector framework (Arriba / S/4 / MDG / BTP), P2P/AP automation setup, UAT scenario development, and 90-day hypercare. Built once, replicated per instance.

INFOSYS — SYSTEM INTEGRATOR (12 MONTHS)
\$500,000 indicative - 1-year add-on
A dedicated five-person Infosys pod — program manager, subject-matter expert, project manager and two business analysts — owning per-BU deployment, SAP-side coordination, documentation and change support through the first year.

YEAR 1 IMPLEMENTATION — GRAND TOTAL
Aerchan platform implementation (\$1.15M) + Infosys SI add-on, 12 months (~\$500K, indicative) | **\$1,650,000**

AERCHAN IMPLEMENTATION — COST BREAKDOWN
CORE IMPLEMENTATION
Advisory, blueprint & product configuration (incl. P2P/AP) | **\$700,000**
Solution & programme lead | **\$150,000**
Product consultants (jointly across Modules 1-3) | **\$300,000**
AI / ML & risk engineering | **\$140,000**
P2P / AP automation configuration | **\$110,000**

INTEGRATIONS
Arriba / S/4 / MDG / BTP connector framework + SAP write-back | **\$250,000**
Integration lead & architects | **\$150,000**
Integration engineers (multi-instance) | **\$100,000**

QA & VALIDATION
UAT, SAT and integration testing across modules | **\$120,000**
QA lead + engineers | **\$20,000**

CUSTOMER SUCCESS
Post-launch support and 90-day hypercare | **\$80,000**
CSM + support engineers | **\$80,000**

Aerchan Implementation Subtotal
Core \$700K + integration \$250K + QA \$120K + Customer Success \$80K | **\$1,150,000**

ROLE	HEADCOUNT	BLENDED / MONTH	ANNUAL FEE
Program Manager — governance, Steering, milestone & client mgmt	1	\$10,833	\$130,000
Subject-Matter Expert — procurement / SAP domain	1	\$9,583	\$115,000
Project Manager — day-to-day tracking, RAID, reporting	1	\$7,917	\$95,000
Business Analyst — BRD, test cases, config support, data governance	2	\$6,667	\$160,000
Infosys SI — total (5 people, 12 months)	5	~\$41,667	\$500,000

Indicative — not a fixed price. Rates are a blended offshore/onshore estimate benchmarked against the SI partner rate card; the final envelope is scoped and confirmed jointly with Infosys against actual staffing and engagement period.

DELIVERY MODEL & COMMERCIALS
Engagement shape | Aerchan-led platform delivery; Infosys as System Integrator (five-person pod) for 12 months. Co-delivery under a single joint programme plan.
Aerchan scope | Platform & agent config, connector framework, P2P/AP setup, UAT, 90-day hypercare.
Infosys scope | Per-BU deployment coordination, SAP-ade liaison, BRD / documentation, test-case & UAT support, change & training, and L3 support during the year.
Duration | ~12 months to full go-live; Infosys SI pod runs 12 months from kick-off.
Infosys SI — pricing basis | **The \$500M figure is an approximate, indicative envelope — not a fixed price.** It is scoped and finalised against the Infosys rate card and the actual staffing required. All add-ons require a signed Change Order.

7 Governance & RACI

ACTIVITY	AERCHAN	INFOSYS (SI)	ADANI
Programme sponsorship	C	C	A / R
Solution design & blueprint	R	C	A
Spend-data extraction & cleansing	C	R	A
Platform & agent configuration	R	C	I
SAP / Arriba / MDG integration	A / R	R	C
Per-BU / per-instance rollout	C	R	A
Change management & training	C	R	A
UAT / SAT	C	R	A / R
Go-live decision	C	C	A
Hypercare & L1 support	R	R	C

R = Responsible, A = Accountable, C = Consulted, I = Informed. Joint programme governance under a single plan. SI scope confirmed at scoping.

8 Security, Compliance & Data Residency

Enterprise-grade by default, and configured to Adani's data-residency and control requirements. Full security questionnaire and architecture available for the IT / Infosec review.

Certifications & attestations	SOC 2 Type II - ISO 27001 - GDPR-aligned
Hosting & data residency	AWS Mumbai (ap-south-1) — data resident in India
Encryption	TLS 1.2+ in transit - AES-256 at rest
Identity & access	RBAC, dimension-based scoping, SSO / SAML 2.0, MFA; separate authentication for shared-service entities
Auditability	Immutable, tamper-evident decision ledger on every agent action — input, identity, rationale, output, ERP write-back
Security testing	Annual third-party VAPT; SAST / DAST in the delivery pipeline
Data handling	Configurable retention - PII minimisation - right-to-erasure support - no training on customer data without consent
Availability & resilience	99.9% uptime SLA; DR with agreed RPO / RTO per enterprise agreement

SOC 2 Type II | ISO 27001 | GDPR | AWS Mumbai - India residency | SSO / SAML - MFA | AES-256 | TLS 1.2+

9 Assumptions & Dependencies

The figures in this proposal are modelled bottom-up on the assumptions below. Each is designed to be replaced with measured Adani numbers during discovery — the estimates are directional, not contractual.

KEY ASSUMPTIONS (TO BE VALIDATED)
Group procurement spend | ~\$20B gross; ~\$12B addressable after carving out commodity/fuel pass-through and intra-group spend
Volume | ~100,000 POs / year across the group (broader procurement-cycle volume is higher)
Sourcing organisation | ~250 FTEs group-wide (illustrative — to be confirmed) for the capacity model
Cycle-time baseline | ~24-day median P2P on complex categories (indicative — to be validated on Adani data)
Infosys SI | Five-person pod, ~\$0.50M — indicative, to be scoped against the Infosys rate card and staffing
Arriba footprint | Cost take-out indicative — to be validated against Adani's Arriba contract

ADANI DEPENDENCIES
Data & access | Timely spend-data extraction and access to SAP S/4HANA, Arriba and MDG
SPOCs | Named business & IT SPOCs per business unit; SI staffing workshop
Scheduling | Discovery confirmed scheduling; UAT resource availability
Decision gates | Sign-off at each phase gate (design, UAT-ready, pilot success, go-live)

AI pricing. The AI pricing reflected here is what it is today, and is an estimate. Final billing on AI / token usage will be as per actuals.
