

The Agentic Procurement Layer for Adani Group

A full, AI-native **Source-to-Pay** platform — vendor onboarding, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — sitting on top of your Ariba, MDG and SAP estate, delivered with **Infosys as System Integrator** across the 14-18-instance group.

PREPARED FOR Suresh Shinde, Group CPO Deyesh Khindalwal, CMO	ENGAGEMENT Full Source-to-Pay Modules 1-3 - with Infosys SI	ESTATE 14 - 18 SAP S/4HANA MDG - Ariba - group-wide	HOSTING AWS Mumbai default India residency

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — one of the few platforms built in India that carries both a full source-to-pay suite and a mature autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Ariba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty
Co-Founder & CEO
BOTS Pilot, Built SupplyStacks (B2B commerce) before founding Aerchain in 2019. 10+ years in procurement & supply chain.

Himavanth Jasti
Co-Founder & CTO
Founding engineering platforms built at scale across fintech, health-tech and H2B-tech. ~60% founding-team retention to date.

CAPITAL & BACKING - \$18M RAISED
Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** Series A re-investor, Season Two Ventures (seed).

PROOF AT CONGLOMERATE SCALE
Live where it matters most
Aerchain runs source-to-contract, group-wide at a **peer Indian conglomerate** — SAP + Ariba integrated, live across multiple heavy-industry verticals, rolling out company by company. A directly relevant precedent for Adani's multi-entity, SAP-heavy estate. (Named references shared separately, under NDA.)

- 45+ enterprise live
- \$45B+ spend processed
- 150K+ suppliers
- Conglomerate-scale S2P, group-wide
- SAP + Ariba integrated
- 30+ countries
- Named references under NDA

WHERE AERCHAIN IS DIFFERENT

- AI-native, not bolted on**
Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.
- Full suite + autonomous sourcing**
The upstream source-to-pay breadth associated with SAP S/4HANA, Ariba, Coupa, Zycus, Jaggaer and GEP, combined with the autonomous-sourcing depth of specialists like Fairmanet, Keelvar and Pacum — brought together in one agentic layer rather than stitched across point tools.
- SAP-native by design**
Bi-directional S/4HANA, ECC and Ariba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

THE ESTATE, AS IT STANDS
SAP-heavy, well-consolidated, MDG-governed

- ERP:** SAP S/4HANA — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under SOX; objects are created once and synced, never duplicated.
- Procurement:** SAP Ariba group-wide since 2022 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted, SLP, Contracts and Spend Analysis adoption is mixed.
- Network:** SAP Business Network for vendor transactions.

THE SPEND, WHERE WE WIN
Full scope, contracted; Ariba displaced in phases
Aerchain contracts for the full source-to-pay suite, but Ariba is displaced progressively — nothing is ripped out on day one. The fastest wins are where Ariba's transactional spine hits its limits: high-volume, lower-value spend and the ~70% of volume who sit in the tail. We take those first, then move up toward the strategic core as the estate standardises.
Tactical - MRO, services, logistics, mid-value capex
Tail - indirect, plant-local, MSME, ad-hoc
Strategic - bulk commodities, EPC, capex, fuels
Phased - Ariba near-term

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

- Too slow & fragmented today**
A stricter onboarding process, built to de-risk, has become painfully lengthy.
 - No single owner — the vendor is spread across SAP, Ariba and MDG.
 - Blocking and backlisting still run over email.
- Costly third-party diligence**
The current TBDT process is commercially expensive and externally dependent.
 - Adverse media, financial, legal and business risk — all bought out.
 - No configurable, per-BU risk appetite.
- Unstructured master data**
No structured OEM-vendor tagging in MDG, and multiple codes per item.
 - SKU, Schaeffler, NSK and their channel partners are indistinguishable.
 - So AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES
Layer on Ariba/MDG/SAP now; transition toward SAP-direct as the estate standardises
Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Ariba, writing back to SAP and MDG — never a rip-and-replace.

- Layer on the existing Ariba / MDG / SAP estate from day one — bi-directional write-back, no back-end dev.
- As the estate grows from 14 toward 18 instances and processes standardise, the orchestration layer migrates progressively to SAP-direct where Ariba is retired.
- Minors the "sit on top, then expand" pattern already in production at conglomerate scale.

3 Solution Scope

A full, agentic Source-to-Pay suite, governed and SAP-native: AI vendor onboarding with automated due diligence and relationship management; request capture, autonomous and strategic sourcing through to award, contract and PO sync; and procure-to-pay with invoice automation — all with live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS

- Platform Subscription (SaaS)**
The full Source-to-Pay suite (Modules 1-3): Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.
- Implementation & Integration Services**
Deploy all three modules; configuration, SAP S/4HANA / Ariba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Module 1 — Vendor Onboarding & Relationship Management | **Module 2 — Source-to-Contract** | **Module 3 — Procure-to-Pay** | **Enterprise Integration (SAP / Ariba / MDG)**

Infosys — System Integrator

FULL SOURCE-TO-PAY SUITE — IN SCOPE

- Enterprise Intake & Request Capture**
Enterprise-wide request capture for **15,000 business users** via a single sign-on — sourcing, contract, onboarding, invoice requests. With AI auto-classification and policy-based routing. Zero procurement training for requesters.
- Vendor Onboarding + Due Diligence**
AI-assisted negotiation (buyer initiated or self-serviced), COPIRANCA validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain's own AI signal aggregation against a configurable, per-BU risk appetite.
- Autonomous & Strategic Sourcing**
From a vague intake to a complete RFQ — SOW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable autonomy per category (suggest, on-pilot, or full auto). Human-in-the-loop for the first month, becoming progressively more autonomous as confidence builds.
- Vendor Performance Management**
Vendor 360 enriched from GRN data — delivery performance, spend trend, price indices, every PO — plus wellness/compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, tier-change), with scheduled re-certification.
- Negotiation, Award & PO Sync**
Multi-round autonomous negotiation (discovery + benchmark pressure + target push) with a transparent should-cost model. Natural language award scenarios. Award/PO written back to Ariba and SAP S/4HANA via API.
- P2P & AP Automation**
PR-to-PO tracking, GRN, invoice OCR and 2/3-way match, exception handling and AP automation — with payment status & advice made visible to the vendor.

MODULE-BY-MODULE SCOPE & CAPABILITIES
The full Source-to-Pay suite across three modules, each independently licensable — a single group-wide enterprise licence covering all three.

1 Vendor Onboarding & Relationship Management
Onboarding, RFQ, negotiation, performance
ONBOARDING & DUE DILIGENCE

- AI onboarding portal & AI doc extraction
- GST / MSME matching
- Sanctions & adverse media + financial / legal risk
- Per-BU risk appetite

RELATIONSHIP & PERFORMANCE

- Vendor 360 & AVL
- Segmentation
- Block / Unblock & blacklist propagation
- Performance scorecards & CAPA

2 Source-to-Contract
Intake, Strategic + autonomous sourcing + auction, MSA, Contract
INTAKE & SOURCING

- Request intake & auto-classification
- Policy-based routing
- GRN & two-envelope
- Autonomous tactical / full sourcing
- Multi-round negotiation agent

EVALUATE, AWARD & CONTRACT

- AI technical & commercial bid evaluation
- e-auction availability
- NFA & Doc routing
- Award write-back to Ariba / SAP
- Contract handoff (CLM)

3 Procure-to-Pay
PR-to-PO, GRN, Invoice OCR, 2/3-way match, AP
PR-TO-PO & RECEIPT

- PR-to-PO tracker
- PO lifecycle
- GRN

INVOICE & AP

- Invoice OCR
- 2 / 3-way match
- Exception handling
- AP automation
- Payment status & advice made visible to the vendor

MULTI-TENANT, MULTI-BU BY DESIGN
One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with PBAC, dimension-based scoping, and separate authentication for shared service entities such as the ECC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchain.

AUDIT-GRADE GOVERNANCE
Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

IN SCOPE

- Intake & orchestration for 15,000 enterprise business users
- Autonomous + strategic sourcing, intake-to-award
- Award & PO sync to Ariba / SAP S/4HANA
- Vendor onboarding + automated due diligence
- Vendor performance management
- Procure-to-Pay & AP automation — PR-to-PO, GRN, invoice OCR, 2/3-way match
- Integration framework: Ariba + S/4HANA + MDG

OUT OF SCOPE / LATER PHASES

- Third-party catalog aggregation / 1:2 punch-out (Ariba-native)
- Legacy non-SAP ERP integration beyond the Ariba / S/4 / MDG estate (scoped separately)
- Contract redlining / track-changes authoring (roadmap)
- MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service
- Per-additional SAP-instance onboarding beyond Wave 1 (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Ariba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 14 toward 18 instances.

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN

- WAVE 1 - MONTHS 0-6**
Land — priority entities
 - Vendor onboarding + automated due diligence across 3-4 priority SAP instances
 - Autonomous sourcing live on 2-3 categories
 - Platform available group-wide from day one for visibility and reporting
 - Human-in-the-loop sourcing
- WAVE 2 - MONTHS 6-9**
Scale — across the estate
 - Additional SAP instances onboarded
 - Autonomous sourcing widened by category
 - Vendor performance management deployed across more of the 24 businesses
 - Confidence-threshold auto-award introduced
- WAVE 3 - MONTHS 9-12**
Standardise — group-wide
 - Full coverage across all activated instances (toward 18)
 - Downstream P2P / AP automation rolled out across the estate
 - Progressive transition to SAP-direct where Ariba is retired
 - Broader strategic-spend coverage & MDM rationalisation activated as agreed

IMPLEMENTATION TIMELINE — 12 MONTHS

- Discovery & Blueprint
- Integration Foundation
- Platform Configuration
- Wave-1 Instance Onboarding
- Data, Diligence & Training
- UAT / SAT
- Go-Live & Hypercare

A live demonstration on Adani's actual data follows within two weeks of scoping confirmation. A greenfield deployment is 3-4 months; at Adani's multi-instance scale we plan for a full year — delivered in three waves — to absorb integration depth and master-data complexity across the estate.

DELIVERY TEAM — A SENIOR, SAP-FLUENT POD

5 Commercial Proposal — Full Source-to-Pay

The full Source-to-Pay suite across **three modules** — Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay — as a single group-wide platform subscription of **\$2.1M / year**, price-locked for 3 years. Implementation is delivered with **Infosys as System Integrator**.

YEAR 1 INVESTMENT SUMMARY — FULL S2P (MODULES 1-3)
Aerchain Agentic Source-to-Pay Platform — Adani Group, delivered with Infosys as System Integrator

\$2,100,000
Platform Subscription (yr) — full scope licence (Modules 1-3), price-locked 3 yrs

\$1,650,000
Implementation (year 1) — Aerchain \$1.5M + Infosys \$1,200M (indicative)

Year 1 Total Investment: \$3,750,000

MODULE	PLATFORM FEE (SaaS / YR)	IMPLEMENTATION (ONE-TIME)
Module 1 — Vendor Onboarding & Relationship Management	\$350,000	\$150,000
Module 2 — Source-to-Contract	\$950,000	\$600,000
Module 3 — Procure-to-Pay	\$800,000	\$400,000
Full S2P Total — Modules 1-3	\$2,100,000	\$1,150,000

Platform fees are annual SaaS (a single group-wide enterprise licence, unlimited users, price-locked for 3 years). Implementation is one-time (Aerchain; excludes the Infosys SI add-on). Years 2-3 = platform only (\$2,100,000). AI / token usage is billed separately, on actuals — indicative ~\$400,000 / yr (an estimate at today's AI pricing; final billing as per actuals).

3-YEAR INVESTMENT PROFILE (USD)

Year 1	\$2.1M platform	\$1,650M impl + S	\$3,750M
Year 2	\$2.1M platform	—	\$2,100M
Year 3	\$2.1M platform	—	\$2,100M

3-Year Total Cost of Ownership: **\$7,950,000**

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3
Platform Subscription (S2P)	\$2,10M	\$2,10M	\$2,10M
Implementation — Aerchain	\$1,150M	—	—
System Integrator — Infosys (1 yr)	\$0,500M	—	—
Total	\$3,750M	\$2,10M	\$2,10M

3-Year Total Contract Value: **\$7,950,000** - Platform price-locked for 3 years

Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchain) and the Infosys SI add-on are one-time, Year-1 only. AI / token usage is billed on actuals (indicative ~\$400k/yr).

TWO COMMERCIAL STRUCTURES

- OPTION A: Enterprise Bundle**
Full S2P (Modules 1-3) as a single commitment. Unlimited users, all 24 BUs. Platform price fixed for 3 years.

Platform Subscription (SaaS)	\$2,100,000 / yr
Implementation — Aerchain	\$1,150,000
System Integrator — Infosys (1 yr)	\$500,000
Year 1 Total	\$3,750,000
Year 2 (Platform only)	\$2,100,000
Year 3 (Platform only)	\$2,100,000
3-Year Total	\$7,950,000

Platform fixed at \$2,100,000 for Years 1-3. From Year 4, 10% escalation per year.
- OPTION B: Module-by-Module**
Each module licensed independently at a 20% premium on platform fees, for the flexibility of activating modules at different times.

Platform Subscription (SaaS)	\$2,520,000 / yr
Implementation — Aerchain	\$1,150,000
System Integrator — Infosys (1 yr)	\$500,000
Year 1 Total	\$4,170,000
Year 2 (Platform only)	\$2,520,000
Year 3 (Platform only)	\$2,520,000
3-Year Total	\$9,210,000

Option B = \$2,100,000 platform + 120 × \$2,520,000/yr. Subject to standard 10%/yr from Year 2.

MODULE	PLATFORM FEE (SaaS / YR)	IMPLEMENTATION (ONE-TIME)
Module 1 — Vendor Onboarding & Relationship Management	\$350,000	\$150,000
Module 2 — Source-to-Contract	\$950,000	\$600,000
Module 3 — Procure-to-Pay	\$800,000	\$400,000
Full S2P Total — Modules 1-3	\$2,100,000	\$1,150,000

Platform fees are annual SaaS (a single group-wide enterprise licence, unlimited users, price-locked for 3 years). Implementation is one-time (Aerchain; excludes the Infosys SI add-on). Years 2-3 = platform only (\$2,100,000). AI / token usage is billed separately, on actuals — indicative ~\$400,000 / yr (an estimate at today's AI pricing; final billing as per actuals).

3-YEAR INVESTMENT PROFILE (USD)

Year 1	\$2.1M platform	\$1,650M impl + S	\$3,750M
Year 2	\$2.1M platform	—	\$2,100M
Year 3	\$2.1M platform	—	\$2,100M

3-Year Total Cost of Ownership: **\$7,950,000**

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3
Platform Subscription (S2P)	\$2,10M	\$2,10M	\$2,10M
Implementation — Aerchain	\$1,150M	—	—
System Integrator — Infosys (1 yr)	\$0,500M	—	—
Total	\$3,750M	\$2,10M	\$2,10M

3-Year Total Contract Value: **\$7,950,000** - Platform price-locked for 3 years

Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchain) and the Infosys SI add-on are one-time, Year-1 only. AI / token usage is billed on actuals (indicative ~\$400k/yr).

ANNUAL SUBSCRIPTION	SCOPE	NAMED USERS	PRICE LOCK
\$2,100,000	Full S2P	Unlimited	3 Years

KEY COMMERCIAL TERMS	
Subscription Commencement	12-month tenure from implementation Kick-off. Group-wide licence across all business units and all three modules.
Billing	Annual subscription and implementation billed in advance from project Kick-off. Infosys SI billed per the joint implementation-services schedule.
Payment Terms	Net 30 - milestone-linked on implementation — no upfront exceeding 20% of contract value
AI / token usage	Billed separately on actuals — an estimate at today's AI pricing (indicative ~\$400k/yr); final billing as per actuals
System Integrator	Infosys engaged for a 12-month rollout add-on (~\$0.50M) — scope and staffing in Section 6
Taxes	Not included; applicable taxes charged separately per jurisdiction
Contracting	Governed by a Master Services Agreement (MSA) between Aerchain and Adani; this proposal forms the commercial schedule to that agreement
Proposal Validity	60 days from date of submission

Companion documents. This proposal covers scope, delivery and fees. The value case — savings, ROI and payback — is modelled separately in the companion **Business Case** document, and the AI / token operating-cost detail in the companion **Tokenization & AI Operating-Cost** document.

6 Implementation Services & System Integrator (Infosys)

Implementation is delivered as a **joint engagement**: Aerchain owns the platform, agent configuration and the connector framework; **Infosys** is engaged as System Integrator — a focused five-person pod for a 12-month rollout across the 14-18-instance estate.

AERCHAIN — PLATFORM IMPLEMENTATION
\$1,150,000 one-time
Platform & agent configuration, the connector framework (Ariba / S/4 / MDG / BTP), P2P/AP automation setup, UAT, scenario development, and 90-day hypercare. Built once, replicated per instance.

INFOSYS — SYSTEM INTEGRATOR (12 MONTHS)
\$500,000 indicative, 1-year add-on
A dedicated five-person Infosys pod — program manager, subject-matter expert, project manager and two business analysts — owning per-BU deployment, SAP-side coordination, documentation and change support through the first year.

YEAR 1 IMPLEMENTATION — GRAND TOTAL
Aerchain platform implementation (\$1,150M) + Infosys SI add-on (12 months) (~\$0.50M, indicative)

\$1,650,000

IMPLEMENTATION — COST BREAKDOWN	
CORE IMPLEMENTATION Advisory, blueprint & product configuration (incl. P2P/AP)	\$700,000
Solution & programme lead	\$150,000
Product consultants (jointly across Modules 1-3)	\$300,000
AI / ML & risk engineering	\$140,000
P2P / AP automation configuration	\$110,000

INTEGRATIONS	
Ariba / S/4 / BTP connector framework + SAP write-back	\$250,000
Integration lead & architects	\$150,000
Integration engineers (multi-instance)	\$100,000

QA & VALIDATION	
UAT, SAT and integration testing across modules	\$120,000
QA lead + engineers	\$120,000

CUSTOMER SUCCESS	
Post-launch support and 90-day hypercare	\$80,000
CSM + support engineers	\$80,000

Aerchain Implementation Subtotal Core \$700K + Integration \$250K + QA \$120K + Customer Success \$80K	\$1,150,000
--	--------------------

INFOSYS SYSTEM INTEGRATOR — FIVE-PERSON POD, 12 MONTHS (INDICATIVE)

ROLE	HEADCOUNT	BLENDED / MONTH	ANNUAL FEE
Program Manager — governance, steerCo, milestone & client mgmt	1	\$10,833	\$130,000
Subject-Matter Expert — procurement / SAP domain	1	\$9,583	\$115,000
Project Manager — day-to-day tracking, RAID, reporting	1	\$7,917	\$95,000
Business Analyst — BRD, test cases, config support, data governance	2	\$6,667	\$160,000
Infosys SI — total (5 people, 12 months)	5	~\$41,667	\$500,000

Indicative — not a fixed price. Rates are a blended offshorshore estimate benchmarked against the SI partner rate card; the final envelope is scoped and confirmed jointly with Infosys against actual staffing and engagement period.

DELIVERY MODEL & COMMERCIALS	
Engagement shape	Aerchain-led platform delivery; Infosys as System Integrator (five-person pod) for 12 months. Co-delivery under a single joint programme plan.
Aerchain scope	Platform & agent config, connector framework, P2P/AP setup, UAT, 90-day hypercare.
Infosys scope	Per-BU deployment coordination, SAP-side liaison, BRD / documentation, test-case & UAT support, change & training, and L1 support during the year.
Duration	~12 months to full go-live; Infosys SI pod runs 12 months from kick-off.
Infosys SI — pricing basis	The \$0.50M figure is an approximate, indicative envelope — not a fixed price. It is scoped and finalised against the Infosys rate card and the actual staffing required. All add-ons require a signed Change Order.

7 Governance & RACI

Aerchain Implementation Subtotal

Core \$700K + Integration \$250K + QA \$120K + Customer Success \$80K

\$1,150,000

INFOSYS SYSTEM INTEGRATOR — FIVE-PERSON POD, 12 MONTHS (INDICATIVE)

ROLE	HEADCOUNT	BLENDED / MONTH	ANNUAL FEE
------	-----------	-----------------	------------

R = Responsible, A = Accountable, C = Consulted, I = Informed. Joint programme governance under a single plan; SI scope confirmed at scoping.

8 Security, Compliance & Data Residency

Enterprise-grade by default, and configured to Adani's data-residency and control requirements. Full security questionnaire and architecture available for the IT / InfoSec review.

Certifications & attestations	SOC 2 Type II: ISO 27001 - GDPR-aligned
Hosting & data residency	AWS Mumbai (ap-south-1) — data resident in India
