TECHNICAL & COMMERCIAL PROPOSAL · FULL SOURCE-TO-PAY · JUNE 2026 · AERCHAIN × ADANI GROUP

The **Agentic Procurement** Layer for Adani Group

A full, AI-native **Source-to-Pay** platform — vendor onboarding, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — sitting on top of your Ariba, MDG and SAP estate, delivered with **Infosys** as System Integrator across the 14→18-instance group.

PREPARED FOR	ENGAGEMENT	ESTATE	HOSTING
Suresh Shinde, Group CPO Devesh Khandelwal, GM	Full Source-to-Pay Modules 1–3 · with Infosys SI	14 → 18 SAP S/4HANA MDG · Ariba · group-wide	AWS Mumbai default India residency

Prepared by **Gaurav K. Guha**, Head of Sales, Aerchain · gaurav.guha@aerchain.io · +91 96195 04839

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — the only Indian platform that carries both a full source-to-pay suite and a best-in-class autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Ariba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty
Co-Founder & CEO
BITS Pilani | EX BOSCH
BITS Pilani. Built SupplyBasics (B2B commerce) before founding Aerchain in 2019. 10+ years in procurement & supply chain.

Himavanth Jasti
Co-Founder & CTO
BITS Pilani | EX BANK OF AMERICA · practo
Founding engineering. Platforms built at scale across fintech, health-tech and HR-tech. ~80% founding-team retention to date.

CAPITAL & BACKING · $16M RAISED
Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** seed + Series A re-investor; Season Two Ventures (seed).

ACCELERATORS: Jio GenNext · Innovation Brewery · Supply Chain Labs by Lumis

INVESTORS · $16M TOTAL RAISED: Pavestone (SERIES A LEAD) · Infosys (SERIES A) · indiamart (SEED) · S2 Season Two Ventures (SEED)

CERTIFICATIONS: ISO 27001 Certified · EU GDPR Compliant · SOC 2 Type II Certified

INTEGRATIONS: SAP · Microsoft Dynamics 365 · SAP Ariba · coupa · ORACLE · servicenow · ZYCUS · ivalua

RECOGNITIONS: Gartner · SaaS BOOMi · Inc42 · ProcureTech

Profitable & cash-flow positive · 125+ team · Bengaluru HQ · Founded 2019

Across customer base	Active on platform	Within 90 days	Cycle-time reduction	30+ countries	ISO 27001 · GDPR

PROOF AT CONGLOMERATE SCALE

Live where it matters most

Aerchain runs source-to-contract group-wide at a **peer Indian conglomerate** — SAP + Ariba integrated, live across multiple heavy-industry verticals, rolling out company by company. A directly relevant precedent for Adani's multi-entity, SAP-heavy estate. (Named references shared separately, under NDA.)

45+ enterprises live · $45B+ spend processed · 150K+ suppliers · Conglomerate-scale S2C, group-wide · SAP + Ariba integrated · 30+ countries · Named references under NDA

WHERE AERCHAIN IS DIFFERENT

- **AI-native, not bolted on** — Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.
- **Full suite + autonomous sourcing** — Everything Ariba, Coupa, Zycus, Jaggaer and GEP do — plus the autonomous-sourcing depth of Fairmarkit, Keelvar and Pactum. They each hold a fraction; we hold the whole.
- **SAP-native by design** — Bi-directional S/4HANA, ECC and Ariba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

2 Understanding Adani's Requirement

Adani is one of India's most mature SAP customers. The estate is largely built; the next move is intelligence, not integration. This proposal maps directly to the two priorities surfaced on 27 May: a faster, governed vendor-onboarding and due-diligence process, and an autonomous sourcing layer for the tactical and tail spend — both sitting on top of Ariba, MDG and SAP.

Ariba Spend	Purchase Orders	Operating Businesses	SAP Instances
$20B+	**~100K**	**24+**	**14→18**
Through Ariba annually	Per year	Group-wide	Growing via M&A

THE ESTATE, AS IT STANDS

SAP-heavy, well-consolidated, MDG-governed

- **ERP:** SAP S/4HANA — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- **Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under SOX; objects are created once and synced, never duplicated.
- **Procurement:** SAP Ariba group-wide since 2021 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted; SLP, Contracts and Spend Analysis adoption is mixed.
- **Network:** SAP Business Network for vendor transactions.

THE SPEND, WHERE WE WIN

Strategic stays; we take the tactical & tail

Of the $20B+ routed through Ariba, the strategic core is well served. The opportunity is the slice where Ariba's transactional spine hits its limits — high-volume, lower-value spend with no human bandwidth for competitive bidding, and the ~70% of vendors who sit in the tail.

Strategic · bulk commodities, EPC, capex, fuels	Ariba retains
Tactical · MRO, services, logistics, mid-value capex	Aerchain
Tail · indirect, plant-local, MSME, ad-hoc	Aerchain

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

Slow & fragmented today
A deliberately stricter onboarding process — built to de-risk bad vendors — has become very lengthy. No single owner; the vendor is spread across SAP, Ariba and MDG. Blocking and blacklisting still run over email.

Costly third-party diligence
The current TBDT process — adverse media, financial, legal and business risk — is commercially expensive and externally dependent, with no configurable per-BU risk appetite.

Unstructured master data
No structured OEM-vs-dealer tagging in MDG (SKF, Schaeffler, NSK and their channel partners), and multiple codes per item — so AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES

Layer on Ariba/MDG/SAP now; transition toward SAP-direct as the estate standardises
Phase 1, Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Ariba, writing back to SAP and MDG. As the estate grows from 14 toward 18 instances and processes standardise over time, the same orchestration layer migrates progressively to SAP-direct where Ariba is retired — without forcing a rip-and-replace at any point. This mirrors the "sit on top, then expand" pattern already in production at conglomerate scale.

Honest scope boundaries. Aerchain is a technology platform, not a catalog aggregator — third-party marketplace (L2 punch-out) integration into your Ariba is already handled natively by Ariba and is not part of this proposal. Contract redlining / track-changes authoring is on our roadmap, not in current scope; we generate contracts from awards and hold the rate-contract repository today. Atlas (the conversational agent) reaches general availability shortly and is positioned as an enablement layer, not a Phase-1 dependency.

3 Solution Scope

A full, agentic Source-to-Pay suite, governed and SAP-native: AI vendor onboarding with automated due diligence and relationship management; request capture, autonomous and strategic sourcing through to award, contract and PO sync; and procure-to-pay with invoice automation — all with live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS

1. **Platform Subscription (SaaS)** — the full Source-to-Pay suite (Modules 1–3): Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.
2. **Implementation & Integration Services** — deploy all three modules: configuration, SAP S/4HANA / Ariba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Module 1 — Vendor Onboarding & Relationship Management · Module 2 — Source-to-Contract · Module 3 — Procure-to-Pay · Enterprise Integration (SAP / Ariba / MDG) · Infosys — System Integrator

Phase 1 landing scope: Vendor onboarding with AI-assisted due diligence as the wedge + autonomous sourcing for tactical and tail spend + strategic sourcing orchestration over the existing Ariba / SAP / MDG estate. Integration is a dedicated program line — not bundled into platform fees.

FULL SOURCE-TO-PAY SUITE — IN SCOPE

Intake & Orchestration
Enterprise-wide request capture for **15,000 business users** via a single co-pilot — sourcing, contract, onboarding or invoice requests, with AI auto-classification and policy-based routing. Zero procurement training for requesters.

Autonomous & Strategic Sourcing
From a vague intake to a complete RFQ — SOW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable autonomy per category: suggest, co-pilot, or full-auto. Human-in-the-loop for the first months, then touchless.

Negotiation, Award & PO Sync
Multi-round autonomous negotiation (discovery → benchmark pressure → target push) with a transparent should-cost model. Natural-language award scenarios. Award/PO written back to Ariba and SAP S/4HANA via API.

Vendor Onboarding + Due Diligence
AI-assisted registration (buyer-initiated or self-service), GST/PAN/MCA validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain's own AI signal aggregation against a configurable, per-BU risk appetite.

Vendor Performance Management
Vendor 360 enriched from GRN data — delivery performance, spend trend, price indices, every PO — plus web/news/compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, tier-change), with scheduled recertification.

Spend Insights
Category dashboards with live market indices — steel with contract-lock signals, ocean freight benchmarked with a disruption monitor, lubricants priced off crude / base-oil / SN-150 / SN-500 formulas — plus geopolitical supply-risk analysis.

MODULE-BY-MODULE SCOPE & CAPABILITIES

The full Source-to-Pay suite across three modules, each independently licensable — a single group-wide enterprise licence covering all three.

1 Vendor Onboarding & Relationship Management — ✓ In scope
Onboarding · TPDD · Vendor 360 · Performance
AI onboarding portal · AI doc extraction · GST / MSME matching · Sanctions & adverse media · Financial & legal risk · Per-BU risk config · Vendor 360 & AVL · Performance & CAPA / VPE

2 Source-to-Contract — ✓ In scope
Intake · Strategic + autonomous sourcing · e-Auction · NFA · Contract
Co-pilot for 15,000 users · AI auto-classification · Policy-based routing · RFx & two-envelope · AI TBER & CS · Autonomous tactical / tail · Multi-round negotiation agent · Should-cost (live indices) · NFA & DoA routing · Award write-back to Ariba / SAP · Contract handoff (CLM)

3 Procure-to-Pay — ✓ In scope
PR-to-PO · GRN · Invoice OCR · 2/3-way match · AP
PR-to-PO tracker · PO lifecycle & GRN · Invoice OCR · 2 / 3-way match · Exception handling · Payment release · AP automation

INTEGRATION ARCHITECTURE — CONFIGURED AT THE OBJECT AND INTERFACE LEVEL, NOT CUSTOM-CODED

Today — SAP / Ariba / MDG
- SAP S/4HANA — PR & vendor master
- Ariba — onboarding front end + guided buying
- MDG — master data (no OEM/dealer tag)

→ REST / RFC / BAPI → PHASE 1 LAYER ON TOP

Phase 1 — Aerchain — AI front end + write-back
- AI onboarding & due diligence
- Autonomous & strategic sourcing
- REST API / RFC / BAPI to Ariba
- Bi-directional write-back to SAP & MDG

→ AS IT STANDARDISES → FUTURE STATE

Future state — SAP / MDG direct
- Aerchain onboarding + sourcing → SAP / MDG direct
- As processes standardise and Ariba is progressively retired

MULTI-TENANT, MULTI-BU BY DESIGN
One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with RBAC, dimension-based scoping, and separate authentication for shared-service entities such as the GCC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchain.

AUDIT-GRADE GOVERNANCE
Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

IN SCOPE
- ✓ Intake & orchestration for 15,000 enterprise business users
- ✓ Autonomous + strategic sourcing, intake-to-award
- ✓ Award & PO sync to Ariba / SAP S/4HANA
- ✓ Vendor onboarding + automated due diligence
- ✓ Vendor performance management
- ✓ Spend insights with live market indices
- ✓ Integration framework: Ariba + S/4HANA + MDG

OUT OF SCOPE / LATER PHASES
- ○ Third-party catalog aggregation / L2 punch-out (Ariba-native)
- ○ Legacy non-SAP ERP integration beyond the Ariba / S4 / MDG estate (scoped separately)
- ○ Contract redlining / track-changes authoring (roadmap)
- ○ MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service
- ○ Per-additional-SAP-instance onboarding beyond Wave 1 (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Ariba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 14 toward 18 instances.

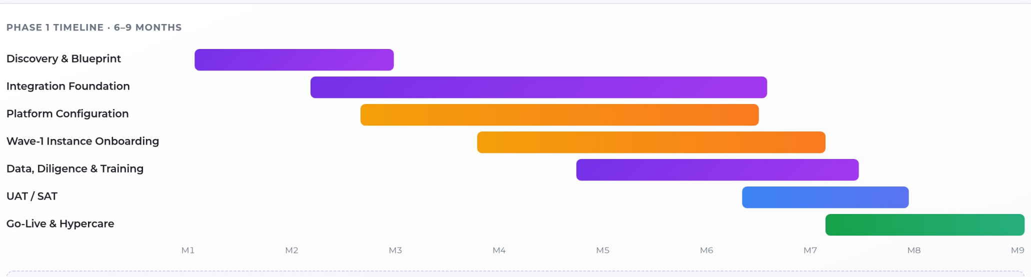

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN

WAVE 1 · MONTHS 0–9
Land — priority entities
Vendor onboarding + automated due diligence + autonomous sourcing on 2–3 categories, live across 3–4 priority SAP instances. Platform available group-wide from day one for spend visibility and reporting. Human-in-the-loop sourcing.

WAVE 2 · YEAR 2
Scale — across the estate
Additional instances onboarded; autonomous sourcing widened by category; vendor performance management and spend insights deepened across more of the 24 businesses. Confidence-threshold auto-award introduced.

WAVE 3 · YEAR 3+
Standardise — group-wide
Full coverage across all activated instances (toward 18). Progressive transition to SAP-direct where Ariba is retired. Expansion lanes — downstream P2P/AP, broader strategic-spend coverage, MDM rationalisation — activated as agreed.

PHASE 1 TIMELINE · 6–9 MONTHS

A live demonstration on Adani's actual data follows within two weeks of scoping confirmation. A greenfield deployment is 3–4 months; at Adani's multi-instance scale we plan for 9 months to absorb integration depth and master-data complexity.

DELIVERY TEAM — A SENIOR, SAP-FLUENT POD

PL	IA	PC	ML	QA	CS
PROGRAMME LEAD	INTEGRATION ×2	PRODUCT ×3	AI / ML	QUALITY	CUSTOMER SUCCESS
Programme Lead	**Integration Architects**	**Product Consultants**	**AI / ML Engineer**	**QA Lead + Engineers**	**Customer Success Manager**
End-to-end accountability · primary POC	Ariba / S/4HANA / MDG APIs, multi-instance	Per-BU configuration & orchestration	Agent config, negotiation & risk models	SAT / UAT across instances	Day-1 hypercare & governance

INTEGRATION PROGRAM — WHAT MAKES ADANI DIFFERENT

A single-instance SAP integration is routine. Adani's distinction is the **connector framework built once** across Ariba + S/4HANA + MDG, then replicated per instance at a declining unit cost as the estate is onboarded wave by wave. This is why integration is scoped as its own program line — not buried in subscription — and why per-additional-instance onboarding beyond Wave 1 carries a fixed, predictable rate.

Bi-directional connectors · Front-end configurable · Webhook write-back · No back-end dev · Multi-realm / multi-currency

Co-delivery with Adani's SI partner is fully supported — this proposal scopes **Infosys** as System Integrator, and other SIs already in the estate are equally supported. Aerchain provides the platform and agent technology; the SI owns advisory, change management and SAP-side integration.

5 Commercial Proposal — Full Source-to-Pay

The full Source-to-Pay suite across **three modules** — Vendor Onboarding & Relationship Management, Source-to-Contract, and Procure-to-Pay — as a single group-wide platform subscription of **$2.0M / year**, price-locked for 3 years. Implementation is delivered with **Infosys as System Integrator**.

YEAR 1 INVESTMENT SUMMARY — FULL S2P (MODULES 1–3)
Aerchain Agentic Source-to-Pay Platform — Adani Group, delivered with Infosys as System Integrator

$2,000,000 — Platform Subscription / yr — full-scope licence (Modules 1–3), price-locked 3 yrs
$1,650,000 — Implementation, Year 1 — Aerchain $1.15M + Infosys SI $0.50M

Year 1 Total Investment **$3,650,000**

MODULE-BY-MODULE PRICING BREAKDOWN — FULL S2P

MODULE	PLATFORM FEE (SAAS / YR)	IMPLEMENTATION (ONE-TIME)
Module 1 — Vendor Onboarding & Relationship Management	$300,000	$150,000
Module 2 — Source-to-Contract	$900,000	$600,000
Module 3 — Procure-to-Pay	$800,000	$400,000
Full S2P Total — Modules 1–3	**$2,000,000**	**$1,150,000**

Platform fees are annual SaaS (a single group-wide enterprise licence, unlimited users, price-locked for 3 years). Implementation is one-time (Aerchain; excludes the Infosys SI add-on). Years 2–3 = platform only ($2,000,000).

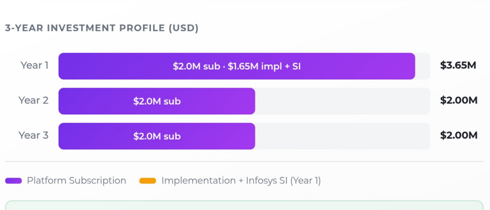

What the $2.0M actually pays for — the full cost stack. The annual platform fee is built bottom-up. Approximately **$0.80M / year (~$67K / month, ~$2.68 / cycle)** is Aerchain's internal AI operating (token) cost to run the full autonomous intake-to-pay agent stack across ~300,000 procurement cycles. The remainder covers the platform and the team around it:

ANNUAL PLATFORM FEE — INTERNAL COST STACK (ILLUSTRATIVE)

COST COMPONENT	APPROX. / YR	SHARE
AI operating (token) cost — ~300K cycles	$0.80M	~40%
Cloud hosting & infrastructure — compute, DB, search, storage (AWS Mumbai)	$0.30M	~15%
Customer success, support & SLA — dedicated CSM, 99.9% uptime	$0.25M	~12.5%
Product, R&D & ongoing model / feature development	$0.30M	~15%
Go-to-market, account management & margin	$0.35M	~17.5%
Total annual platform fee	**$2.00M**	**100%**

Indicative cost composition. The AI (token) line is carried by Aerchain as a fixed internal cost — never billed to Adani per token or per cycle — and the customer price is **fixed for the 3-year term regardless of movement in Aerchain's internal AI cost** (which historically trends down). Full derivation in the companion *Tokenization & AI Operating-Cost* document.

3-YEAR INVESTMENT PROFILE (USD)

3-Year Total Cost of Ownership **$7,650,000**

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3
Platform Subscription (S2P)	$2.00M	$2.00M	$2.00M
Implementation — Aerchain	$1.15M	—	—
System Integrator — Infosys (1 yr)	$0.50M	—	—
Total	**$3.65M**	**$2.00M**	**$2.00M**

3-Year Total Contract Value: $7,650,000 · Platform price-locked for 3 years

Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchain) and the Infosys SI add-on are one-time, Year-1 only.

TWO COMMERCIAL STRUCTURES

OPTION A — Enterprise Bundle (RECOMMENDED)
Full S2P (Modules 1–3) as a single commitment. Unlimited users, all 24 BUs. Platform price fixed for 3 years.

Platform Subscription (SaaS)	$2,000,000 / yr
Implementation — Aerchain	$1,150,000
System Integrator — Infosys (1 yr)	$500,000
Year 1 Total	**$3,650,000**
Year 2 (Platform only)	$2,000,000
Year 3 (Platform only)	$2,000,000
3-Year Total	**$7,650,000**

Platform fixed at $2,000,000/yr for Years 1–3. From Year 4: 10% escalation per year.

OPTION B — Module-by-Module
Each module licensed independently at a 20% premium on platform fees, for the flexibility of activating modules at different times.

Platform Subscription (SaaS)	$2,400,000 / yr
Implementation — Aerchain	$1,150,000
System Integrator — Infosys (1 yr)	$500,000
Year 1 Total	$4,050,000
Year 2 (Platform only)	$2,400,000
Year 3 (Platform only)	$2,400,000
3-Year Total	$8,850,000

Option B = $2,000,000 platform × 1.20 = $2,400,000/yr. Subject to standard 10%/yr from Year 2.

SUBSCRIPTION OVERVIEW

ANNUAL SUBSCRIPTION	SCOPE	NAMED USERS	PRICE LOCK
$2,000,000	Full S2P	Unlimited	3 Years

Single platform subscription covers the full Source-to-Pay suite (Modules 1–3): vendor onboarding + relationship management, source-to-contract (intake, strategic & autonomous sourcing, negotiation, e-auction, NFA, contract), and procure-to-pay (PR-to-PO, invoice automation, 2/3-way match, AP) — plus supplier portal, analytics, Ariba + SAP S/4HANA + MDG integration, all AI capabilities (AI operating cost carried internally by Aerchain), cloud hosting (SOC 2 · ISO 27001 · GDPR), upgrades, support, and a dedicated CSM. Group-wide enterprise licence — no per-region, per-user, or per-transaction uplift.

KEY COMMERCIAL TERMS

Subscription Commencement	12-month tenure from Implementation Kick-Off. Group-wide licence across all business units and all three modules.
Billing	Annual subscription and implementation billed in advance from project kick-off. Infosys SI billed per the joint implementation-services schedule.
Payment Terms	Net 30 · milestone-linked on implementation — no upfront exceeding 20% of contract value
AI Operating Cost	Carried internally by Aerchain (~$0.80M/yr) within the platform fee — not billed per token or per cycle
System Integrator	Infosys engaged for a 12-month rollout add-on (~$0.50M) — scope and staffing in Section 6
Taxes	Not included; applicable taxes charged separately per jurisdiction
Proposal Validity	60 days from date of submission

6 Implementation Services & System Integrator (Infosys)

Implementation is delivered as a **joint engagement**: Aerchain owns the platform, agent configuration and the connector framework; **Infosys** is engaged as System Integrator — a focused five-person pod for a 12-month rollout across the 14→18-instance estate.

AERCHAIN — PLATFORM IMPLEMENTATION
$1,150,000 one-time
Platform & agent configuration, the connector framework (Ariba / S4 / MDG / BTP), P2P/AP automation setup, UAT scenario development, and 90-day hypercare. Built once, replicated per instance.

INFOSYS — SYSTEM INTEGRATOR (12 MONTHS)
$500,000 indicative · 1-year add-on
A dedicated five-person Infosys pod — program manager, subject-matter expert, project manager and two business analysts — owning per-BU deployment, SAP-side coordination, documentation and change support through the first year.

YEAR 1 IMPLEMENTATION — GRAND TOTAL **$1,650,000**
Aerchain platform implementation ($1.15M) + Infosys SI add-on, 12 months (~$0.50M, indicative)

AERCHAIN IMPLEMENTATION — COST BREAKDOWN

CORE IMPLEMENTATION — **$700,000**
Advisory, blueprint & product configuration (incl. P2P/AP)

Solution & programme lead	$150,000
Product consultants (config across Modules 1–3)	$300,000
AI / ML & risk engineering	$140,000
P2P / AP automation configuration	$110,000

INTEGRATIONS — **$250,000**
Ariba / S4 / MDG / BTP connector framework + SAP write-back

Integration lead & architects	$150,000
Integration engineers (multi-instance)	$100,000

QA & VALIDATION — **$120,000**
UAT, SAT and integration testing across modules

QA lead + engineers	$120,000

CUSTOMER SUCCESS — **$80,000**
Post-launch support and 90-day hypercare

CSM + support engineers	$80,000

Aerchain Implementation Subtotal — **$1,150,000**
Core $700K + Integration $250K + QA $120K + Customer Success $80K

INFOSYS SYSTEM INTEGRATOR — FIVE-PERSON POD, 12 MONTHS (INDICATIVE)

ROLE	HEADCOUNT	BLENDED / MONTH	ANNUAL FEE
Program Manager — governance, SteerCo, milestone & client mgmt	1	$10,833	$130,000
Subject-Matter Expert — procurement / SAP domain	1	$9,583	$115,000
Project Manager — day-to-day tracking, RAID, reporting	1	$7,917	$95,000
Business Analyst — BRD, test cases, config support, data governance	2	$6,667	$160,000
Infosys SI — total (5 people, 12 months)	**5**	**~$41,667**	**$500,000**

Indicative — not a fixed price. Rates are a blended offshore/onshore estimate benchmarked against the SI partner rate card; the final envelope is scoped and confirmed jointly with Infosys against actual staffing and engagement period.

DELIVERY MODEL & COMMERCIALS

Engagement shape	Aerchain-led platform delivery; Infosys as System Integrator (five-person pod) for 12 months. Co-delivery under a single joint programme plan.
Aerchain scope	Platform & agent config, connector framework, P2P/AP setup, UAT, 90-day hypercare.
Infosys scope	Per-BU deployment coordination, SAP-side liaison, BRD / documentation, test-case & UAT support, change & training, and L1 support during the year.
Duration	6–9 months to Wave-1 go-live; Infosys SI pod runs 12 months from kick-off.
Infosys SI — pricing basis	**The $0.50M figure is an approximate, indicative envelope — not a fixed price.** It is scoped and finalised against the Infosys rate card and the actual staffing required. All add-ons require a signed Change Order.

7 Governance & RACI

RESPONSIBILITY MATRIX (RACI) — AERCHAIN-LED, INFOSYS AS SI

ACTIVITY	AERCHAIN	INFOSYS (SI)	ADANI
Programme sponsorship	C	C	A / R
Solution design & blueprint	R	C	A
Spend-data extraction & cleansing	C	R	A
Platform & agent configuration	R	C	I
SAP / Ariba / MDG integration	A / R	R	C
Per-BU / per-instance rollout	C	R	A
Change management & training	C	R	A
UAT / SAT	C	R	A / R
Go-live decision	C	C	A
Hypercare & L1 support	R	R	C

R = Responsible · A = Accountable · C = Consulted · I = Informed. Joint programme governance under a single plan; SI scope confirmed at scoping.

8 Security, Compliance & Data Residency

Enterprise-grade by default, and configured to Adani's data-residency and control requirements. Full security questionnaire and architecture available for the IT / InfoSec review.

Certifications & attestations	SOC 2 Type II · ISO 27001 · GDPR-aligned
Hosting & data residency	AWS Mumbai (ap-south-1) — data resident in India
Encryption	TLS 1.2+ in transit · AES-256 at rest
Identity & access	RBAC, dimension-based scoping, SSO / SAML 2.0, MFA; separate authentication for shared-service entities
Auditability	Immutable, tamper-evident decision ledger on every agent action — input, identity, rationale, output, ERP write-back
Security testing	Annual third-party VAPT; SAST / DAST in the delivery pipeline
Data handling	Configurable retention · PII minimisation · right-to-erasure support · no training on customer data without consent
Availability & resilience	99.9% uptime SLA; DR with agreed RPO / RTO per enterprise agreement

SOC 2 Type II · ISO 27001 · GDPR · AWS Mumbai · India residency · SSO / SAML · MFA · AES-256 · TLS 1.2+

9 Assumptions & Dependencies

The figures in this proposal are modelled bottom-up on the assumptions below. Each is designed to be replaced with measured Adani numbers during discovery — the estimates are directional, not contractual.

KEY ASSUMPTIONS (TO BE VALIDATED)

Group procurement spend	~$20B gross; ~$12B addressable after carving out commodity/fuel pass-through and intra-group spend
Volume	~300,000 procurement cycles / year (of which ~100,000 become formal POs)
Complexity mix	~50% tail · 30% standard · 15% tactical · 5% complex (drives the AI operating cost)
Sourcing organisation	~250 FTEs group-wide (illustrative — to be confirmed) for the capacity model
Cycle-time baseline	~24-day median P2P on complex categories (indicative — to be validated on Adani data)
Infosys SI	Five-person pod, ~$0.50M — indicative, to be scoped against the Infosys rate card and staffing
Ariba footprint	Cost take-out indicative — to be validated against Adani's Ariba contract

ADANI DEPENDENCIES

Data & access	Timely spend-data extraction and access to SAP S/4HANA, Ariba and MDG
SPOCs	Named business & IT SPOCs per business unit; SI staffing confirmed
Scheduling	Discovery workshop scheduling; UAT resource availability
Decision gates	Sign-off at each phase gate (design, UAT-ready, pilot success, go-live)

AI pricing. Current AI pricing; Aerchain's internal cost is re-baselined against live usage, while the **customer price is fixed for the term**. AI processing costs have historically trended down — any reduction accrues to Aerchain's internal margin, not a change to the agreed platform fee.

This document is confidential and intended solely for Adani Group. Pricing valid 60 days from issue and subject to finalisation on written confirmation of scope. Figures are indicative pending confirmation of activated instances, transaction volumes and integration scope.
