

The Agentic Procurement Layer for Adani Group

An AI-native sourcing, vendor-onboarding and spend-intelligence layer that sits at top of your Ariba, MDG and SAP estate today — and transitions toward SAP-direct as the group's SAP estate grows from 1s toward 1B instances.

PREPARED FOR	ENGAGEMENT	ESTATE	NOTING
Surety Shrinidehi Girdhar CEO Devesh Khushdelwal CMO	Upstream Agentic SPC + Vendor Onboarding	1s - 1B SAP S/4HANA MDG: Ariba - group-wide	AI/ML-native, default BYOC supported

Prepared by: **Gaurav K. Guha**, Head of Sales, AERCHAN - gauravgk@adherchain.in | +91-96955 04639

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — the only Indian platform that carries both a full source-to-pay suite and a best-in-class autonomous-sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Ariba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty
Co-Founder & CEO
Ex @ BOSCH
BTS Head, Buss Supply/Seco B2B converted before founding Aerchain in 2019. 10+ years in procurement & supply chain.

Himavanth Jasti
Co-Founder & CTO
Ex @ BANK OF AMERICA | @procto
Founding engineering, Platform built at scale across BFSI, health-tech and H&Tech - 40% growth / team retention to date.

CAPITAL & RAISING - \$16M RAISED
Series A led by **Pavestone** with **Inforsys** (investing directly / unusual) — Inforsys normally builds its own. **IndiaMart** used + Series A re-investor. Season 2 Ventures (seed).

PROOF AT CONGLOMERATE SCALE
Live where it matters most
The Reliance Group runs Aerchain source-to-contract group-wide — SAP + Ariba integrated, live across hydrocarbons, O&C and manufacturing, rolling out company by company. The directly relevant, precedent for Adani's multi-entity, SAP-heavy estate.
Reliance Group: 52k group-wide | Unlever - autonomous sourcing on Group
AB InBev | Danone | Meta - auctions | 3DE Peet's | Emirates Global Aluminium
NSE - BYOC | Centuryply

WHERE AERCHAIN IS DIFFERENT
AI-native, not bolted on
Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.
Full suite + autonomous sourcing
Everything Ariba, Coupa, Zycus, Jaggar and CEP do — plus the autonomous-sourcing depth of Farmkraft, Keshav and Pactum. They each hold a fraction; we hold the whole.
SAP-native by design
Bi-directional S/4HANA, ECC and Ariba connectors. Multi-realm, multi-entity, multi-currency. The estate stays the system of record.

2 Understanding Adani's Requirement

Adani is one of India's most mature SAP customers. The estate is largely built; the next move is intelligence, not integration. This proposal maps directly to the two priorities surfaced on 27 May: a faster, governed vendor-onboarding and due-diligence process, and an autonomous sourcing layer for the tactical and tail spend — both sitting on top of Ariba, MDG and SAP.

Ariba Spend
\$20B+
Through Ariba annually

Purchase Orders
~100K
Per year

Operating Businesses
24+
Group-wide

SAP Instances
14+18
Growing via M&A

THE ESTATE, AS IT STANDS
SAP-heavy, well-consolidated, MDG-governed

- ERP:** SAP S/4HANA — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under S/4HANA; objects are created once and synced, never duplicated.
- Procurement:** SAP Ariba group-wide since 2021 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted; SLP, Contracts and Spend Analysis adoption is mixed.
- Network:** SAP Business Network for vendor transactions.

STRATEGIC SPEND; WE TAKE THE TACTICAL & TAIL
Of the \$20B+ routed through Ariba, the strategic core is well served. The opportunity is the slice where Ariba's transactional spine hits its limits — high volume, lower-value spend with no human bandwidth for competitive bidding, and the ~70% of vendors who sit in the tail.
Strategic: bulk commodities, EPC, capex, fuels **Ariba retains**
Tactical: MRO, services, logistics, mid-value capex **Aerchain**
Tail: indirect, plant-local, MSME, ad-hoc **Aerchain**

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

Slow & fragmented today
A deliberately stricter onboarding process — built to de-risk bad vendors — has become very lengthy. No single owner; the vendor is spread across SAP, Ariba and MDG. Blocking and backlogging still run over email.

Costly third-party diligence
The current TBDT process — adverse media, financial, legal and business risk — is commercially expensive and externally dependent, with no configurable per-BU risk appetite.

Unstructured master data
No structured OEM vs-dealer tagging in MDG (SKF, Schaeffler, NSK and their channel partners), and multiple codes per item — so AI can't yet make policy-aligned recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES

Phase 1 landing scope: Vendor onboarding with AI-assisted due diligence as the wedge + autonomous sourcing for tactical and tail spend + strategic sourcing orchestration over the existing Ariba / SAP / MDG estate. Integration is a dedicated program line — not bundled into platform fees.

Layer on Ariba/MDG/SAP now; transition toward SAP-direct as the estate stabilises
Phase 1, Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Ariba, writing back to SAP and MDG. As the estate grows from 1s toward 1B instances and processes standardise over time, the same orchestration layer migrates progressively to SAP-direct where Ariba is retired — without forcing a rip-and-replace at any point. This mirrors the Reliance and Unilever "sit on top, then expand" pattern already in production.

Honest scope boundaries. Aerchain is a technology platform, not a catalog aggregator — third-party marketplace (L2 punch-out) integration into your Ariba is already handled natively by Ariba and is not part of this proposal. Contract redlining / track-changes authoring is on our roadmap, not in current scope; we generate contracts from awards and add the rate-contract repository today. Atlas (the conversational agent) reaches general availability shortly and is positioned as an enablement layer, not a Phase 1 dependency.

3 Solution Scope

An upstream agentic procurement suite, governed and SAP-native: request capture for every business user, autonomous and strategic sourcing through to award and PO sync, AI vendor onboarding with automated due diligence, vendor performance management, and live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS
1 Platform Subscription (SaaS) — Modules 1-3: Vendor Onboarding & Management, Intake & Orchestration, and Sourcing & Negotiation. A single group-wide enterprise licence — unlimited users, all 24 BU, price-locked for 3 years.
Module 1 — Vendor Onboarding & Management **Module 2 — Intake & Orchestration** **Module 3 — Sourcing & Negotiation** **Enterprise Integration (SAP / Ariba / MDG)**
Module 4 — P2P Automation: Future

2 Implementation & Integration Services — deploy all three modules: configuration, SAP S/4HANA / Ariba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Phase 1 landing scope: Vendor onboarding with AI-assisted due diligence as the wedge + autonomous sourcing for tactical and tail spend + strategic sourcing orchestration over the existing Ariba / SAP / MDG estate. Integration is a dedicated program line — not bundled into platform fees.

UPSTREAM AGENTIC SUITE — IN SCOPE

Intake & Orchestration
Enterprise-wide request capture for **15,000 business users** via a single co-pilot — sourcing, contract, onboarding or invoice requests, with AI auto-classification and policy-based routing. Zero procurement training for requesters.

Autonomous & Strategic Sourcing
From a vague intake to a complete RFQ — SCW, payment terms, Q&A, vendor shortlist — auto-built and launched. Configurable autonomy per category/supplier, or all-in or full-auto, human-in-the-loop for the first months, then touchless.

Negotiation, Award & PO Sync
Multi-round autonomous negotiation (discovery + benchmark premium + target push) with a transparent should-cost model. Natural language award scenarios. Award/PO written back to Ariba and SAP S/4HANA via API.

Vendor Onboarding + Due Diligence
AI-assisted registration (login initiated or self-service), GST/pan/MAA validation, and automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain's own AI signal aggregation against a configurable, per-BU risk appetite.

Vendor Performance Management
Vendor 360 enriched from GRN data — delivery performance, spend trend, price indices, every PO — plus webflow/compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, fee change), with scheduled re-certification.

Spend Insights
Category dashboards with live market indices — steel with contract lock signals, ocean freight benchmarked with a disruption monitor. Substantia proof-of-effort (base oil / 24-30 / 24-30) / 24-30 formulas — plus geospatial supply-risk analysis.

MODULE-BY-MODULE SCOPE & CAPABILITIES

Each module is independently licensable. Phase 1 covers Modules 1-3; Module 4 (P2P) is a committed future line — separate terms at activation.

1 Vendor Onboarding & Management
Vendor risk & TREC / Vendor 360 - Performance
Phase 1
AI onboarding portal | AI doc extraction | CBT / MSME matching | Sanctions & adverse media
Financial & legal risk | Per-BU risk config | Vendor 360 & AVL | CAPA & VPE records
2 Intake & Orchestration
Request capture - AI routing - RB to PO
Phase 1
Co-pilot for 15,000 users | AI auto-classification | PR-to-PO tracker | Policy-based routing
Multi-BU / B2AC | Immutable audit ledger | Spend insights (live indices) | Atlas conversational agent

3 Sourcing & Negotiation
Strategic - Autonomous - Auction - NFA
Phase 1
RFQ & two-envelope | AI TBBQ & CS | Auction amenability | Autonomous tactical / tail
Multi-round negotiation agent | Should-cost (live indices) | NFA & Dock routing
Award write-back to Ariba / SAP
4 P2P Automation
PR-to-PO - Invoice OCR - AP
Future - Separate Terms
PO Receipts & GRN | 3-way match | Invoice OCR | 2/3-way match | Exception handling
Payment release

INTEGRATION ARCHITECTURE — CONFIGURED AT THE OBJECT AND INTERFACE LEVEL, NOT CUSTOM-CODED

Today
SAP / Ariba / MDG
SAP S/4HANA — PR & vendor master
Ariba — onboarding front-end & guided buying
MDG — master data (no OEM/dealer tag)

Phase 1 — Aerchain
AI onboarding & due diligence
Autonomous & strategic sourcing
REST API / RFC / SAPi to Ariba & MDG

Future state
SAP / MDG direct
Aerchain onboarding + sourcing + SAP / MDG direct
As processes standardise and Ariba is progressively retired

MULTI-TENANT, MULTI-BU BY DESIGN

One orchestration layer, configured per business unit — airports and defence (highly regulated), and strategic sourcing through to award and PO sync. AI vendor onboarding with automated due diligence, vendor performance management, and live spend intelligence.

IN SCOPE
Intake and orchestration for 15,000 enterprise business users
Autonomous + strategic sourcing, intake-to-award
Award & PO sync to Ariba / SAP S/4HANA
Vendor onboarding + automated due diligence
Vendor performance management
Spend insights with live market indices
Integration framework: Ariba + S/4HANA + MDG

AUDIT-GRADE GOVERNANCE
Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, outcome, ERP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying post-facto audit on day one.

OUT OF SCOPE / LATER PHASES
Third-party catalog aggregation / L2 punch-out (Ariba-native)
P2P, GRN and AP automation — already on SAP; available as a future expansion line
Contract redlining / track-changes authoring (roadmap)
MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service
Per-additional SAP-instance onboarding beyond Wave 1 (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Ariba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 1s toward 1B instances.

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN
WAVE 1 - MONTHS 0-9
Land — priority entities
Vendor onboarding + automated due diligence + autonomous sourcing on 2-3 categories, live across 3-4 priority SAP instances. Platform available group-wide from day one for spend visibility and reporting. Human-in-the-loop sourcing.
WAVE 2 - YEAR 2
Scale — across the estate
Additional instances onboarded; autonomous sourcing widened by category; vendor performance management and spend insights deepened across more of the 24 businesses. Confidence-threshold auto-award introduced.
WAVE 3 - YEAR 3+
Standardise — group-wide
Full coverage across all activated instances (toward 1B). Progressive transition to SAP-direct where Ariba is retired. Expansion lines — downstream P2P/AP, broader strategic-spend coverage, MDG rationalisation — activated as agreed.

PHASE 1 TIMELINE - 6-9 MONTHS
Discovery & Blueprint
Integration Foundation
Wave-1 Instance Onboarding
Data, Diligence & Training
UAT / SAT
Go-Live & Hypercare

A live demonstration on Adani's actual data follows within two weeks of scoping confirmation. A greenfield deployment in 3-4 months; at Adani's multi-instance scale we plan to 1st to absorb integration depth and 9th to deliver the platform.

DELIVERY TEAM — A SENIOR, SAP-FLUENT POD

PL - PROGRAMME LEAD
End-to-end accountability
Primary CRO

IA - INTEGRATION & IMPLEMENTATION
Ariba / S/4HANA / MDG APIs, multi-instance

PC - PRODUCT CONSULTANTS
Per-BU configuration & validation

ML - AI / ML ENGINEER
AI agent config, regulation & risk models

QA - QUALITY
QA Lead & Engineers
SAT / UAT across instances

CS - CUSTOMER SUCCESS
Customer Success Manager
Day 1 hypercare & governance

INTEGRATION PROGRAM — WHAT MAKES ADANI DIFFERENT

A single instance SAP integration is routine. Adani's distinction is the **connector framework built once** across Ariba + S/4HANA + MDG, then replicated per instance at a declining unit cost as the estate is onboarded wave by wave. This is why integration is scoped as its own program line — not buried in subscription — and why per-additional instance onboarding beyond Wave 1 carries a fixed, predictable rate.

Bi-directional connectors **Front-end configurable** **Webhook write-back** **No back-end dev** **Multi-realm / multi-currency**

Co-delivery with Adani's chosen SI partner (Accenture, IBM, or others already in the estate) is fully supported — Aerchain provides the platform and agent technology; the SI can own advisory, change management and SAP-aaS integration, as at Unilever.

5 Commercial Proposal

YEAR 1 INVESTMENT SUMMARY
Aerchain Agentic Procurement Layer — Adani Group Deployment
\$950,000
Platform Subscription — per year | Modules 1-3 (enterprise licence)
\$750,000
Implementation & Integration — one-time (Phase 1)
Year 1 Total Investment: \$1,700,000

MODULE-BY-MODULE PRICING BREAKDOWN

MODULE	PLATFORM FEE (\$AAS / YR)	IMPLEMENTATION (ONE-TIME)	PHASE
Module 1 — Vendor Onboarding & Management	\$190,000	\$150,000	Phase 1
Module 2 — Intake & Orchestration	\$332,500	\$262,500	Phase 1
Module 3 — Sourcing & Negotiation	\$427,500	\$337,500	Phase 1
Module 4 — P2P Automation	Future	Future	Future
Phase 1 Total — Modules 1-3	\$950,000	\$750,000	

Platform fees are annual SaaS; implementation is one-time. Module allocation follows a 2:1:3:1.5:4.5 weighting across Modules 1-3. Year 1 = platform + implementation (\$1,700,000); Year 2-3 = platform only (\$950,000), price-locked.

3-YEAR INVESTMENT PROFILE (USD)

Year	Platform Subscription	Implementation (one-time)	Total
Year 1	\$0.95M sub \$0.75M imp		\$1.70M
Year 2	\$0.95M sub		\$0.95M
Year 3	\$0.95M sub		\$0.95M

3-Year Total Cost of Ownership: **\$3,600,000**

YEAR-BY-YEAR BREAKDOWN

COMPONENT	Y1	Y2	Y3
Platform Subscription	\$0.95M	\$0.95M	\$0.95M
Implementation & Integration	\$0.75M	—	—
Total	\$1.70M	\$0.95M	\$0.95M

IMPLEMENTATION BREAKDOWN
■ Core Implementation — \$474K | ■ Integration (Ariba/S/4HANA/MDG) — \$146K | ■ QA & Validation — \$89K
■ Customer Success — \$50K
3-Year Total Contract Value: **\$3,600,000**. Multi-year commitment eligible for 5-10% discount.
Subscription priced as a phased enterprise term tied to wave activations: locked at signing, no mid-term escalation. Per-additional instance onboarding beyond Wave 1 priced separately.

TWO COMMERCIAL STRUCTURES

OPTION A: Enterprise Single
Full Modules 1-3 as a single commitment. Unlimited users, all 24 BU. Price fixed for 3 years — no increase until Year 4.
Platform Subscription (SaaS) **\$950,000 / yr**
Implementation & Integration **\$750,000**
Year 1 Total **\$1,700,000**
Year 2 (Platform only) **\$950,000**
Year 3 (Platform only) **\$950,000**
3-Year Total **\$3,600,000**
Fixed at \$950,000/yr for Years 1-3. From Year 4: 10% escalation per year.

OPTION B: Module-by-Module
Each module licensed independently at a 20% premium on platform fees. Same implementation cost. Activate modules at different times.
Platform Subscription (SaaS) **\$1,140,000 / yr**
Implementation & Integration **\$750,000**
Year 1 Total **\$1,890,000**
Year 2 (Platform only) **\$1,140,000**
Year 3 (Platform only) **\$1,140,000**
3-Year Total **\$3,170,000**
Option B = \$950K platform + 120 = \$1,140,000/yr. Subject to standard 10%/yr from Year 2.

Year 4+ escalation (Option A): \$950,000/yr is fixed for Years 1-3 with zero escalation; +10% per annum from Year 4 — full cost certainty across the initial terms.

SUBSCRIPTION OVERVIEW

ANNUAL SUBSCRIPTION
\$950,000

NAMED USERS
Unlimited

PLATFORM Uptime SLA
99.99%

PRICE LOCK
3 Years

Single platform subscription covers: full upstream agentic suite (Intake & orchestration, autonomous & strategic sourcing, vendor onboarding + automated due diligence, vendor performance management, spend insights), supplier portal, analytics dashboard, Ariba + SAP S/4HANA + MDG integration, all AI capabilities, cloud hosting (SOC 1/2 - ISO 27001 - GDPR), product upgrades, standard support, and dedicated Customer Success Manager. Group-wide enterprise licence — no per-region, per-user, or per-transaction uplift.

EVERYTHING INCLUDED IN THE ANNUAL SUBSCRIPTION

Aerchain Platform
Full upstream agentic suite from Day 1 — intake & orchestration, autonomous & strategic sourcing, onboarding + due diligence, VPM, spend insights.
Included

Unlimited Named User Licences
Enterprise licence active from Day 1 — all 15,000 intake users + procurement cover. No per-seat uplift.
Included

SAP / Ariba / MDG Connectors
Pre-built bi-directional integration. No additional integration licensing.
Included

Group-Wide Coverage
Full platform accessible across all business units from Day 1 for spend analytics, supplier visibility & reporting.
Included

Unlimited Supplier Access
No per-supplier fees. All Adani suppliers onboarded free. Unlimited evaluator access.
Included

Upgrades + Hosting + Dedicated CSM
Product upgrades, dedicated CSM, price-locked 3 years.
Included

GLOBAL ENTERPRISE LICENCE — ACTIVE FROM DAY 1

The platform subscription is a **single group-wide enterprise licence** with a **3-year price lock and no escalation**. While implementation is phased by wave and instance for change management, the licence itself is not gated — all business units can access the platform from Day 1 for spend analytics, supplier visibility, and reporting. As additional instances activate across waves, there are no additional licensing fees, no uplift beyond the agreed ramp, and no renegotiation. Only the implementation services and per-additional instance onboarding are scoped and priced separately.

KEY COMMERCIAL TERMS

Subscription Commencement

12-month tenure starts from Implementation Kick-off Date. Group-wide platform license across all business units.

Billing

Annual subscription and implementation both billed in advance from the project kick-off date. Subscription tenure commences from kick-off.

Payment Terms

Net 30

Travel & Expenses

Charged on actuals; Adani pre-approval required

Taxes

Not included; applicable taxes charged separately per jurisdiction

Proposal Validity

60 days from date of submission

Supplier Access Fees

None — all Adani suppliers access the platform at no additional cost

Out of Scope

Third-party catalog / L2 punch-out (Ariba-native), downstream P2P / GRN / AP automation, and contract redlining. Per-additional instance onboarding beyond Wave 1 requires separate implementation scoping.

6 Implementation Rate Card & Add-On Services

PROJECT SCOPE
Upstream Agentic Procurement — Phase 1 (Priority Entities)
0 Duration | **6-9 months**

WHAT'S INCLUDED
Discovery & Blueprint
Core Implementation
Integration Setup (Ariba / S/4 / MDG)
Testing & Enablement
Hypercare Training (90 days)
Standard Support
Data Migration & Supplier Onboarding

NOT INCLUDED
Per-additional SAP-instance onboarding beyond Wave 1 (rate-carded)
Third-party catalog / L2 punch-out (Ariba-native)
Downstream P2P / GRN / AP automation
Contract redlining / track-changes authoring
MDG master-data rationalisation / dedup
Extended hypercare beyond 90 days (add-on)
Custom Product Development & Innovation (charged on actuals per rate card)

STANDARD IMPLEMENTATION — GRAND TOTAL
Core implementation - Integration (Ariba/S/4HANA/MDG) - QA & Validation - Customer Success
\$750,000 **PHASE 1 - PRIORITY ENTITIES**

CORE IMPLEMENTATION
Advisory, blueprint, and core product configuration
\$474,000
