

The Agentic Procurement Layer for Adani Group

A full, AI-native **Source-to-Pay** platform — delivering onboarding, intake & orchestration, autonomous & strategic sourcing, and P2P/AP Automation — sitting on top of existing **S/4HANA**, MDG and SAP estate, delivered with **Infosys** as System Integrator across the 14-18 instance group.

PREPARED FOR

Sunil Shinde, Group CPO
Dewash Khundelwal, CSM

ENGAGEMENT

Full Source-to-Pay
Modules 1-4, with Infosys SI

ESTATE

14-18 SAP S/4HANA
MDG, Arriba - group-wide

SYSTEMS

AI/ML-enabled, default
BYOC supported

Prepared by: **Gaurav K. Guha**, Head of Sales, AERCHON | gaurav@adani.aerchon.in | +91 96095 04639

Valid for 60 days from date of issue

1 Introduction & About Aerchain

Aerchain is an AI-native spend operating system — the only Indian platform that carries both a full source-to-pay suite and a best-in-class autonomous sourcing engine. We do not replace SAP. We sit over the existing S/4HANA, MDG and Arriba estate as the agentic execution and intelligence layer.

LEADERSHIP

Harsha Kadimisetty
Co-Founder & CEO
Infosys
1815+ Clients, Built Supplychains B2B network before founding Aerchain in 2009. 10+ years in procurement & supply chain.

Himavanth Jasti
Co-Founder & CTO
Pavestone
EX BANK OF AMERICA
Awarded engineering, Platform built at scale across finance, health-tech and hi-tech, ~80% founding team retention to date.

CAPITAL & BACKING - \$1M RAISED

Series A led by **Pavestone**, with **Infosys** investing directly (unusual — Infosys normally builds its own). **IndiaMart** seed + Series A re-investor, Season Two Ventures (seed).

PROOF AT CONGLOMERATE SCALE

Live where it matters most

Aerchain runs source-to-contract group-wide at a **peer Indian conglomerate** — SAP + Arriba integrated, live across multiple heavy-industry verticals, filling out company by company. A directly relevant precedent for Adani's multi-entity, SAP-heavy estate. (Named references shared separately under NDA.)

45+ enterprises live | \$45B+ spend processed | 150K+ suppliers

Conglomerate-scale S2C, group-wide | SAP + Arriba integrated | 30+ countries

Named references under NDA

WHERE AERCHAIN IS DIFFERENT

AI-native, not bolted on

Multi-agent orchestration runs the full intake-to-award lifecycle — built AI-first, not retrofitted.

Full suite + autonomous sourcing

Everything Arriba, Coupa, Zycus, Jaggar and CEP do — plus the autonomous-sourcing depth of Fairmarkit, Koeber and Factum. They each had a factor, we hold the whole.

SAP-native by design

Bi-directional S/4HANA, ECC and Arriba connectors, Multi-realm, multi-entity, multi-currency. The estate stays in the system of record.

2 Understanding Adani's Requirement

Adani is one of India's most mature SAP customers. The estate is largely built; the next move is intelligence, not integration. This proposal maps directly to the two priorities surfaced on 27 May, a faster, governed vendor-onboarding and due-diligence process, and an autonomous sourcing layer for the tactical and tail spend — both sitting on top of Arriba, MDG and SAP.

Arriba Spend

SAP Instances

14+18

Growing via M&A

THE ESTATE, AS IT STANDS

SAP-heavy, well-consolidated, MDG-governed

- ERP SAP S/4HANA** — 14 instances today, potentially growing to 18 as more businesses are brought under the group umbrella. ECC still present in pockets.
- Master data:** SAP MDG / OneData, hub-and-spoke across the group. ECC remains the system of record for cost centres and GL under S/2X; objects are created once and synced, never duplicated.
- Procurement:** SAP Ariba group-wide since 2021 — Sourcing, SLP, Contracts, Spend Analysis. Sourcing is well adopted; SLP, Contracts and Spend Analysis adoption is mixed.
- Network:** SAP Business Network for vendor transactions.

THE LIVE PAIN — VENDOR ONBOARDING & DUE DILIGENCE

Slow & fragmented today

A deliberately slower onboarding process — built to de-risk bad vendors — has become very lengthy. No single owner; the vendor is spread across SAP, Arriba and MDG. Blocking and blacklisting still run on email.

Costly third-party diligence

The current TBDT process — adverse media, financial, legal and business risk — is commercially expensive and externally dependent, with no configurable per-BU risk appetite.

Unstructured master data

No structured OEM-vs-dealer tagging in MDG (SAP, Schaeffler, NDA and their channel partners), and multiple codes per item — so AI can't yet make policy-guided recommendations.

WHAT WE SIT ON TOP OF — AND WHERE IT GOES

Layer on **Arriba/MDG/SAP now**; transition toward **SAP-direct** as the estate standardises

Phase 1: Aerchain is the AI onboarding, due-diligence and sourcing front end on top of Arriba, writing back to SAP and MDG. As the estate grows from 14 toward 18 instances and processes standardise over time, the same orchestration layer migrates progressively to SAP-direct where Arriba is retired — without forcing a rip-and-replace at any point. This mirrors the "sit on top, then expand" pattern already in production at conglomerate scale.

Honest scope boundaries. Aerchain is a technology platform, not a catalog aggregator — third-party marketplace (L2 punch-out) integration into your Arriba is already handled externally by Arriba and is not part of this proposal. Contract redlining / track-changes authoring is on our roadmap, not in current scope. We generate contracts from awards and hold the rate-contract repository today. Atlas (the conversational agent) reaches general availability shortly and is positioned as an enablement layer, not a Phase-1 dependency.

3 Solution Scope

An upstream agentic procurement suite, governed and SAP-native request capture for every business user, autonomous and strategic sourcing through to award and PO sync. AI, vendor onboarding with automated due diligence, vendor performance management, and live spend intelligence.

PROPOSAL COVERAGE — TWO CORE COMMITMENTS

1 Platform Subscription (SaaS) — the full Source-to-Pay suite (Modules 1-4): Vendor Onboarding & Management, Intake & Orchestration, Sourcing & Negotiation, and P2P & AP Automation. A single group-wide enterprise licence — unlimited users, all 24 BUs, price-locked for 3 years.

2 Implementation & Integration Services — deploy all three modules: configuration, SAP S/4HANA / Arriba / MDG integration, UAT, change management, training, and 90-day hypercare. Milestone-linked — no upfront beyond 20% of contract value.

Module 1 — Vendor Onboarding & Management

Module 2 — Intake & Orchestration

Module 3 — Sourcing & Negotiation

Enterprise Integration (SAP / Arriba / MDG)

Infosys — System Integrator

Module 4 — P2P & AP Automation

Phase 1 landing scope: Vendor onboarding with AI-assisted due diligence as the wedge + autonomous sourcing for tactical and tail spend + strategic sourcing orchestration over the existing Arriba / SAP / MDG estate. Integration is a dedicated program line — not bundled into platform fees.

UPSTREAM AGENTIC SUITE — IN SCOPE

Intake & Orchestration

Enterprise-wide request capture for **50,000 business users** via a single co-UI — sourcing, contract, onboarding per invoice

Autonomous & Strategic Sourcing

From a vague intent to a complete RFQ — SOW, payment terms, S&A, vendor shortlist — auto-built and launched. Configurable autonomy per category, suggest, co-pilot, or full-auto. Human-in-the-loop for the first months, then touchless.

Negotiation, Award & PO Sync

Multi-round autonomous negotiation (discovery + benchmark, pressure — target push) with a transparent check-out cost model. Natural-language award scenarios. Awards/PO written back to Arriba and SAP S/4HANA via API.

Vendor Onboarding + Due Diligence

AI-assisted registration (buyer-initiated or self-service), CTRM/ECR validation, automated diligence — sanctions, adverse media, financial and legal risk — via integration with external sources or Aerchain team & signal aggregation against a configurable, per-BU risk appetite.

Vendor Performance Management

Vendor 360 enriched from CRM data — delivery performance, spend trend, price index, early PO — plus web-based compliance intelligence. Scorecards and policy-driven re-evaluation triggers (time, compliance, ten-change), with scheduled re-certification.

Spend Insights

Category dashboards with live market index — steel with contract-book signals, ocean freight benchmarked with a deviation monitor, lubricants priced off crude / base oil / SN 50 / SN 500 formulae — plus granular supply risk analysis.

MODULE-BY-MODULE SCOPE & CAPABILITIES

Each module is independently licensable. Phase 1 covers Modules 1-3. Module 4 (P2P) is a committed future line — separate terms at activation.

1 Vendor Onboarding & Management

Vendor risk & TCO — Vendor 360 Performance

AI onboarding portal | AI doc extraction | CET / MSME matching | Sanctions & adverse media | Financial & legal risk | Per-BU risk config | Vendor 360 & AVL | CAPA & VPE scorecards

2 Intake & Orchestration

Request capture, AI routing, PB-to-PO

Co-pilot for 15,000 users | AI auto-classification | PB-to-PO tracker | Policy-based routing | Multi-BU RBAC | Immutable audit ledger | Spend insights (Bx Index) | Atlas conversational agent

3 Sourcing & Negotiation

Discovery, AI, N/A

RFP & 3-way match | AI TBER & CS | Auction amenability | Autonomous tactical / tail | Multi-round negotiation | Should-cost (Bx Index) | NFA D&A routing | Award write-back to Arriba / SAP

4 P2P Automation

Invoice-to-pay, invoice QCL, 20-way match, AP

PO lifecycle & GRN | 3-way match | Invoice OCR | 2 / 3-way match | Exception handling | Payment release

INTEGRATION ARCHITECTURE — CONFIGURED AT THE OBJECT AND INTERFACE LEVEL, NOT CUSTOM-CODED

Today

SAP / Arriba / MDG

• SAP S/4HANA — PR, & vendor master

• Arriba — onboarding front end + guided buying

• MDG — master data (no OEM/dealer tag)

Phase 1 — Aerchain

AI front end + write-back

• AI onboarding & due diligence

• Autonomous & strategic sourcing

• REST API / RFC / BAPI to Arriba

• Bi-directional write-back to SAP & MDG

Future state

SAP / MDG direct

• Aerchain onboarding + sourcing + SAP / MDG direct

• As processes standardise and Arriba is progressively retired

MULTI-TENANT, MULTI-BU BY DESIGN

One orchestration layer, configured per business unit — airports and defence (highly regulated, distinct flows), power, APSEZ, Wilmar — with RBAC, dimension-based scoping, and separate authentication for shared-services entities such as the GCC. Object creation can be restricted to ECC as the single source of truth, with sync-only into Aerchain.

IN SCOPE

✓ Intake & orchestration for 50,000 enterprise business users

✓ Autonomous + strategic sourcing, intake-to-award

✓ Award & PO sync to Arriba / SAP S/4HANA

✓ Vendor onboarding + automated due diligence

✓ Vendor performance management

✓ Spend insights with live market indices

✓ Integration framework: Arriba + S/4HANA + MDG

AUDIT-GRADE GOVERNANCE

Hard limits the agent cannot cross, soft limits that surface for human review, and an immutable, tamper-evident ledger appended on every agent decision — input, identity, rationale, output, EDP write-back. Eight production guardrails, toggle-controlled per category and BU, satisfying audit facts audit on day one.

OUT OF SCOPE / LATER PHASES

○ Third-party catalog aggregation / L2 punch-out (Arriba-native)

○ Legacy non-SAP ERP integration beyond the Arriba / SAP / MDG estate (scoped separately)

○ Contract redlining / track-changes authoring (roadmap)

○ MDG master-data rationalisation (OEM/dealer tagging, dedup) — available as a scoped service

○ Per-additional-SAP-instance onboarding beyond Wave 1 (rate-carded)

4 Implementation & Integration

A phased program built for an estate of this scale: a connector framework built once across Arriba, S/4HANA and MDG, then declining-cost instance onboarding wave by wave — landing in a contained set of priority entities first, then scaling group-wide as the estate grows from 14 toward 18 instances.

GROUP ROLLOUT — WAVE-WISE TRANSFORMATION PLAN

WAVE 1 - MONTHS 0-9

Land — priority entities

Vendor onboarding + automated due diligence + autonomous sourcing on 2-3 categories, live across 3-4 priority SAP instances. Platform available group-wide from day one for spend visibility and reporting. Human-in-the-loop sourcing.

WAVE 2 - YEAR 2

Scale — across the estate

Additional instances onboarded; autonomous sourcing widened by category; vendor performance management and spend insights deployed across more of the 24 businesses. Confidence-threshold auto-award introduced.

WAVE 3 - YEAR 3+

Standardise — group-wide

Full coverage across all activated instances (beyond Wave 1). Progressive transition to SAP-direct where Arriba is retired. Expansion lines — downstream P2P/AP, broader strategic-spend coverage, MDM rationalisation — activated as agreed.

PHASE 1 TIMELINE - 6-9 MONTHS

INTEGRATION PROGRAM — WHAT MAKES ADANI DIFFERENT

A single instance SAP integration is routine. Adani's distinction is the **connector framework built once** across Arriba + S/4HANA + MDG, then replicated per instance at a declining unit cost as the estate is onboarded wave by wave. This is why integration is scoped as its own program line — not buried in subscription — and why per-additional-instance onboarding beyond Wave 1 carries a fixed, predictable rate.

Bi-directional connectors | Front-end configurable | Webhook write-back | No back-end dev | Multi-realm / multi-currency

Co-delivery with Adani's SI partner is fully supported — this proposal scopes **Infosys** as System Integrator, and other SIs already in the estate are equally supported. Aerchain provides the platform and agent technology; the SI owns advisory, change management and SAP-side integration.

5 Commercial Proposal — Full Source-to-Pay

This extends the upstream proposal into the **full Source-to-Pay** scope. Modules 1-3 pricing is unchanged. Module 4 (P2P & AP Automation) is now proposed, bringing the **group-wide** platform subscription to **\$21M / year**. Implementation is delivered with **Infosys as System Integrator**.

YEAR 1 INVESTMENT SUMMARY — FULL S2P (MODULES 1-4)

Aerchain Agentic Source-to-Pay Platform — Adani Group, delivered with Infosys as System Integrator

\$210,00,000

Platform Subscription (yr — full scope running Modules 1-4). Phase 1 running \$250k / yr. P2P activities ~\$2,350,000

Implementation, Year 1 — Aerchain (\$15M + Infosys \$1M + \$120M (optional))

Year 1 Total Investment

\$4,450,000

MODULE	PLATFORM FEE (SaaS / YR)	IMPLEMENTATION (ONE-TIME)	PHASE
Module 1 — Vendor Onboarding & Management	\$180,000	\$150,000	Phase 1
Module 2 — Intake & Orchestration	\$332,500	\$262,500	Phase 1
Module 3 — Sourcing & Negotiation	\$427,500	\$337,500	Phase 1
Module 4 — P2P & AP Automation — highest transaction volume	\$150,000	\$400,000	Phase 2
Full S2P Total — Modules 1-4	\$2,100,000	\$1,150,000	

Platform fees are annual SaaS; implementation is one-time (Aerchain, excludes the Infosys SI add-on). Modules 1-3 are unchanged from the upstream proposal. Module 4 (P2P & AP) is the highest-transaction volume module — PB-to-PO, invoice OCR, 2/3-way match and AP automation across ~100M POs and a larger invoice base, all 24 BUs, with SAP write-back. Years 2-3 — platform only (\$210,000), price-locked. **Billed on activation:** Modules 1-3 (Phase 1) bill at the \$950,000 on-run rate from Phase 1 go-live. Module 4 (P2P & AP) adds \$150,000 only when it activates in Wave 2, stepping the run-rate to the full \$2,100,000. Adani pays only for what is live.

What the AI pricing actually pays for — the full cost stack. The annual platform fee is built bottom-up. Approximately **\$80M / year (~\$67K / month, ~\$2.66 / cycle)** is Aerchain's internal AI operating (token) cost to run the cost stack. The annual platform fee is built bottom-up. Approximately **\$80M / year (~\$67K / month, ~\$2.66 / cycle)** is Aerchain's internal AI operating (token) cost to run the full autonomous intake-to-pay agent stack across ~300,000 procurement cycles (of which ~100,000 become formal POs). The remainder covers the platform and the team around it.

ANNUAL PLATFORM FEE — INTERNAL COST STACK (ILLUSTRATIVE)		
COST COMPONENT	APPROX. / YR	SHARE
AI operating (token) cost — ~300K cycles	\$0.80M	~38%
Cloud hosting & infrastructure — compute, DB, search, storage (AWS Mumbai / BYOC)	\$0.30M	~14%
Customer success, support & SLA — dedicated CSM, 99.9% uptime	\$0.25M	~12%
Product, R&D & ongoing model / feature development	\$0.35M	~17%
Go-to-market, account management & margin	\$0.40M	~19%
Total annual platform fee	\$2.10M	100%

Indicative cost composition. The AI (token) line is carried by Aerchain as a fixed internal cost — never billed to Adani per token or per cycle — and the customer price is fixed for the 3-year term regardless of movement in Aerchain's internal AI cost (which historically trends down). Full agent-by-agent derivation is in the companion Aerchain + Adani — Tokenization & AI Operating-Cost document.

\$2.10M

3-Year Total Contract Value: \$8,650,000 - Platform price-locked for 3 years

Platform subscription is a single group-wide enterprise licence, locked at signing with no mid-term escalation. Implementation (Aerchain) and the Infosys SI add-on are one-time fees. Year 1 only. Per-additional instance onboarding beyond Wave 1 priced separately.

TWO COMMERCIAL STRUCTURES

OPTION A

Enterprise Bundle

Full S2P (Modules 1-4) as a single commitment. Unlimited users, all 24 BUs. Platform price fixed for 3 years.

Platform Subscription (SaaS)

\$2,100,000 / yr

Implementation — Aerchain

\$150,000

System Integrator — Infosys (Y1)*

~\$1,200,000

Year 1 Total

\$4,450,000

Year 2 (Platform only)

\$2,100,000

Year 3 (Platform only)

\$2,100,000

3-Year Total

\$8,650,000

Platform fixed at \$2,100,000/yr for Years 1-3. From Year 4, 10% escalation per year.

OPTION B

Module-by-Module

Staged activation + staggered billing — license and pay for each module from its own go-live, at a 20% premium on platform fees for that flexibility. Ideal where Module 4 (P2P, Phase 2) activates later than Modules 1-3 — you carry only the run-rate for what is live.

Platform Subscription (SaaS)

\$2,520,000 / yr

Implementation — Aerchain

\$150,000

System Integrator — Infosys (Y1)*

~\$1,200,000

Year 1 Total

\$4,870,000

Year 2 (Platform only)

\$2,520,000

Year 3 (Platform only)

\$2,520,000

3-Year Total

\$9,910,000

Option B = \$2,100,000 platform + 120 + \$2,520,000/yr. Subject to standard 10%/yr from Year 2.

Year 4+ escalation (Option A): \$2,100,000/yr is fixed for Years 1-3 with zero escalation; +10% per annum from Year 4 — full cost certainty across the initial term.

SUBSCRIPTION OVERVIEW

ANNUAL SUBSCRIPTION

\$2,100,000

SCOPE

Full S2P

NUMBER USERS

Unlimited

PRICE LOCK

3 Years

Single platform subscription covers the full Source-to-Pay suite (Modules 1-4): vendor onboarding + automated due diligence, intake & orchestration, autonomous & strategic sourcing, and P2P/AP automation — plus supplier portal, analytics, Arriba + SAP S/4HANA + MDG integration, all AI capabilities (AI operating cost carried internally by Aerchain), cloud hosting (SOC 1/2, ISO 27001, GDPR), upgrades, support, and a dedicated CSM. Group-wide enterprise licence — no per region, per-user, or per transaction uplift.

KEY COMMERCIAL TERMS	
Subscription Term	12-month tenure from implementation Kick-Off. Group-wide licence across all business units and all four modules.
Billing	Annual subscription and implementation billed in advance from project kick-off. Infosys SI billed per the joint implementation-services schedule.
Payment Terms	Net 30 - milestone-linked on implementation — no upfront exceeding 20% of contract value
AI Operating Cost	Carried internally by Aerchain (~\$804K/yr) within the platform fee — not billed per token or per cycle
System Integrator	Infosys engaged for a 12-month rollout add-on and rate card in Section 6
Taxes	Not included; applicable taxes charged separately per jurisdiction
Proposal Validity	60 days from date of submission
Out of Scope	Third-party catalog / L2 punch-out (Arriba-native); per-additional-instance onboarding beyond Wave 1 (rate-carded); legacy SAP ERP integration

6 Implementation Services & System Integrator (Infosys)

Full-S2P implementation is delivered as a **joint engagement**. Aerchain owns the platform, agent configuration and the connector framework; **Infosys** is logged in as System Integrator to absorb the rollout volume for a year — per instance/per-BU deployment. SAP-side integration effort, data migration, change management and support across the 14-18 instance estate.

AERCHON — PLATFORM IMPLEMENTATION

\$1,150,000

one-time

Platform & agent configuration, the connector framework (Arriba / S/4 / MDG / BTP), P2P/AP automation setup, UAT scenario development, and 90-day hypercare. Built once, replicated per instance.

INFOSYS — SYSTEM INTEGRATOR (INDICATIVE - 12 MONTHS)

~\$1,200,000

indicative - 1 year add-on

A dedicated Infosys pod handling rollout volume per-BU deployment, SAP-side integration, data migration & vendor-master cleansing, change management, enterprise training, and L3/L2 support through the first year.

YEAR 1 IMPLEMENTATION — GRAND TOTAL

Aerchain platform implementation (\$1150M) + Infosys SI add-on 12 months (\$1,200M, indicative)

~\$1,200,000

DELIVERY MODEL & COMMERCIALS	
Engagement shape	Aerchain-led platform delivery: Infosys as programme integrator absorbing rollout volume for 12 months. Co-delivery governance under a single joint programme plan.
Aerchain scope	Platform & agent config, connector framework, P2P/AP setup, UAT, 90-day hypercare.
Infosys scope	Per-instance/per-BU deployment, SAP-side integration, data migration, change management, enterprise training, L3/L2 support.
Duration	6-9 months to Wave-1 go-live. Infosys SI add-on runs 12 months from kick-off.
Add-on (on actuals)	Per-additional-SAP-instance onboarding beyond Wave 1 (\$48K/instance); extended hypercare (\$28K/month); MDG master-data rationalisation (scoped); custom development (T&M per Change Order).
Infosys SI — pricing basis	The Infosys figure is an approximate, indicative envelope — not a fixed price. It is to be scoped and finalised against the Infosys rate card and the project staffing required (blended offshore/onshore pod), and confirmed jointly at scoping. All add-ons require a signed Change Order.

7 Value & Next Steps

THE ECONOMICS

The fee is a rounding error against the value at stake

~\$5B

Addressed tactical + tail spend

Phase 1 wedge of the \$2B Arriba spine. A 2-3% efficiency gain here is \$100-150M a year — against a rough \$2.1M annual platform fee — so rounding error next to the value modelled in the companion business case.

AI - Led

Covered vendor due diligence

Sanctions, adverse-media and financial / legal risk scored against a configurable, per-BU risk appetite — replacing slow external diligence and the email-based backlogs with a governed, auditable engine.

≥ 70%

Faster vendor onboarding

Committed improvement on the current baseline — collapsing a slow, multi-overs, multi-system process into a single governed flow.

For reference, a 1% improvement across the full \$20B routed through Arriba is \$200M — the group expansion thesis is autonomous sourcing widens from tactical into strategic spend.

NEXT STEPS

✓ Integration architecture document — Arriba / SAP / MDG, with the layered "sit-on-top, then SAP-direct" model. Delivered.

✓ Vendor-onboarding working session — convened with Dewash's team, integration team aligned.

✓ Should-cost challenge — share a real awarded project (BQO + final cost) and we will return an AI-generated estimate to compare.

• Live demonstration on Adani data — within two weeks of scoping confirmation.

• Group CPO virtual review — once Sunesh Shinde has reviewed this proposal.

• Phase-1 deployment — within Wave 1 window of signature.

AERCHON

Make the \$20B already flowing through Arriba 10-15% more effective — with an AI agent layer that closes the gaps SAP cannot, in this release cycle.

Gaurav K. Guha | Head of Sales | gaurav@adani.aerchon.in | +91 96095 04639

AERCHON
